LICENSED SOFTWARE
END USER LICENSE AGREEMENT

This End User License Agreement ("License") is an agreement between you and Electronic Arts Inc. ("EA"). This License governs your use of this software and all related documentation, and updates and upgrades that replace or supplement the software and are not distributed with a separate license (collectively, the "Software"). By installing the Software, you consent to be bound by this License. If you do not agree to the terms of this License, then do not install or use the Software. Section 3 below describes the data EA may use to provide services and support to you in connection with the Software. If you do not agree to this use of data, do not use the Software. If you INSTALL the Software, the terms and conditions of this License are fully accepted by you.

1. License Grant and Terms of Use

1.1. INSTALL the Software, the terms and conditions of this License are fully accepted by you. By installing or using the Software, you consent to be bound by this License. If you do not agree to the terms of this License, you may uninstall the Software provided in connection with this License and supersedes all prior or contemporaneous understandings regarding such subject matter. No modification to this License will be effective unless made in writing and signed by EA.

2. Reservation of Rights and Restrictions

2.1. You have purchased a license to the Software and your rights are subject to the laws of the State of California, any applicable federal law, and this License. EA and its licensors retain all other rights not expressly granted to you in this License. You have purchased a license to the Software and your rights are subject to the laws of the State of California, any applicable federal law, and this License. EA and its licensors retain all other rights not expressly granted to you in this License and its licensors in the Software and does not grant you any rights to any patents, trademarks, or other intellectual property rights therein. This License is limited to the intellectual property rights in the Software and does not extend to any extensions or modifications made to the Software by you or any third party.

3. Consent to Use of Data

3.1. EA may use the data collected by EA or its agents in connection with the Software to improve the Software, to provide you with customer support, to detect and prevent fraud, and to comply with applicable laws and regulations. EA will not use your data for any other purpose without your consent. If you do not wish to have your data collected, you may opt out at any time by following the instructions provided in the Software.

4. Termination

4.1. You may terminate this License at any time by destroying the Software and all copies thereof. This License will terminate immediately upon destruction of the Software.

5. Limited Warranty on Recording Media

5.1. LIMITED WARRANTY ON RECORDING MEDIA THAT ACCOMPANY YOUR SOFTWARE IS FOUND IN THE PRODUCT MANUAL THAT WAS DISTRIBUTED WITH YOUR SOFTWARE AND IS INCORPORATED HEREIN BY REFERENCE. THIS LIMITED WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, YOU MAY ALSO HAVE ADDITIONAL RIGHTS UNDER APPLICABLE LOCAL LAW, WHICH VARY FROM JURISDICTION TO JURISDICTION.

6. Disclaimer of Warranties

6.1. EXCEPT FOR THE LIMITED WARRANTY ON RECORDING MEDIA FOUND IN THE PRODUCT MANUAL, AND TO THE FULLEST EXTENT PERMISSIBLE UNDER APPLICABLE LAW, THE SOFTWARE IS PROVIDED TO YOU "AS IS," WITH ALL FAULTS, WITHOUT WARRANTY OF ANY KIND, AND YOUR USE IS AT YOUR SOLE RISK. THE MAXIMUM LIABILITY OF EA UNDER ANY CIRCUMSTANCES WILL BE THE AMOUNT ACTUALLY PAID BY YOU FOR THE SOFTWARE.

7. Governing Law

7.1. Governing Law: This License is governed by and construed in accordance with the laws of the State of California, without regard to its principles of conflicts of law. No provision of this License is intended to confer any benefits upon any third party and no third party shall be entitled to enforce any provision of this License.

8. Export.

8.1. U.S. Government Restricted Rights. If you are a government entity, then this provision applies to you. The Software provided in connection with this License has been developed entirely at private expense, as defined in FAR section 227.7202-1(a)(1), as well as any software and associated documentation that is distributed in connection with the Software. The Software is subject to additional restrictions that apply when the Software is exported, transferred or distributed outside of the United States. The U.S. Government's rights to use,复制, distribute, disclose or otherwise make available the Software are subject to the FAR section 52.227-14 and FAR section 52.227-19.”

9. Severability

9.1. If any provision of this License is illegal or unenforceable under applicable law, then such provision will be deemed null and void and the remainder of the provision and the License will continue in full force and effect.

10. Governing Law

10.1. Governing Law: This License is governed by and construed in accordance with the laws of the State of California, without regard to its principles of conflicts of law. No provision of this License is intended to confer any benefits upon any third party and no third party shall be entitled to enforce any provision of this License.

11. Entire Agreement

11.1. Entire Agreement: This License constitutes the entire agreement between you and EA with respect to the Software. Any prior or contemporaneous understandings with respect to the Software are superseded by this License. No amendment or modification of this License will be effective unless made in writing and signed by EA.

12. Export

12.1. Export controls. You agree to abide by all applicable export control laws and regulations, including, without limitation, the U.S. Export Administration Regulations, as well as any other applicable law or regulation that may apply to the Software.

13. Governing Law

13.1. Governing Law: This License is governed by and construed in accordance with the laws of the State of California, without regard to its principles of conflicts of law.

14. Entire Agreement

14.1. Entire Agreement: This License constitutes the entire agreement between you and EA with respect to the Software. Any prior or contemporaneous understandings with respect to the Software are superseded by this License. No amendment or modification of this License will be effective unless made in writing and signed by EA.

**INSTALLING THE GAME**

**NOTE:** For system requirements, see www.spore.com/systemrequirements.html.

**NOTE:** If you previously installed the standalone Spore™ Creature Creator, you must uninstall it before you install the full version of Spore™. All of your creations are retained in your My Documents or Documents for Windows Vista™ and Macintosh\My Spore Creations\Creatures folder, and you will then be able to load them in Spore.

**To install on a PC (disc users):**
Insert the disc into your disc drive and follow the on-screen instructions.

**NOTE:** If you previously installed the standalone Spore™ Creature Creator, you must uninstall it before you install the full version of Spore™. All of your creations are retained in your My Documents or Documents for Windows Vista™ and Macintosh\My Spore Creations\Creatures folder, and you will then be able to load them in Spore.

**To install on a Macintosh:**
Insert the game disc into your DVD-ROM drive. A DVD icon representing the game disc appears on your desktop. Double-click the icon to open the game’s launcher.

1. **Patch the game:**
   - Enter the name of your planet, select the difficulty level from the drop-down, and click the right arrow.

2. **For more information, see Your Evolutionary Journey on p. 5.**
3. **After the introduction is played, you can begin the game.**

**STARTING THE GAME**

When starting Spore, we highly recommend you register your game. Registration allows you to share Spore content that you create, access content created by other players, and get updates on patches, new content, and much more.

**Internet connection, online authentication, and end user license agreement required to play. To access online features, you must register online with the provided serial code. Only one registration available per game.**

**EA TERMS & CONDITIONS AND FEATURE UPDATES CAN BE FOUND AT WWW.EA.COM. YOU MUST BE 13+ TO REGISTER ONLINE. EA MAY RETIRE ONLINE FEATURES AFTER 30 DAYS NOTICE POSTED ON WWW.EA.COM.**

**To start Spore:**
1. Close all open programs and background tasks, (see Performance Tips on p. 55 for more info).

   **For PC:** Games on Windows Vista™ are located in the Start > Games menu and on earlier versions of Windows™ in the Start > Programs (or All Programs) menu. (EA Store users must have the EA Download Manager running.)

   **For Macintosh:**
   - Open a Finder window, select ‘Applications,’ and double-click the game’s icon.

2. At the registration screen, you can login to your existing ea.com account or create a new one, then enter a Spore Screen Name (of your choosing).

   **NOTE:** You must create a login and password in order to access online pollinated content.

3. The Galaxy screen is displayed (see p. 5). To begin a new game, click a planet. (You can also choose CREATE to access the Spore Creators.)

4. Select your starting star (and with it, its corresponding home planet).

5. The first time you start your journey, you begin in the Cell stage. In subsequent new games, you can start at any stage up to the latest one you have played in any other saved game.

   **1) Cell**
   **2) Creature**
   **3) Tribe**
   **4) Civilization**
   **5) Space**

WELCOME TO SPORE™

Spore is your own personal universe. In this universe, you can create and evolve life, establish tribes, build civilizations, and even sculpt entire worlds.

The Spore universe is made up of five stages, each corresponding to a stage of evolution: Cell, Creature, Tribal, Civilization, and Space. Each stage presents different challenges and goals.

You begin life as a tiny cell, then you progress through the other stages on your journey to becoming a galactic god.

In Spore, you also have a variety of creation tools at your disposal. You can access these tools through the CREATE button on the Galaxy screen then create every aspect of your universe: creatures, vehicles, buildings, and even spaceships. When you save your creation, it is stored in the Sporepedia and accessible when you play any of the game stages.

YOUR EVOLUTIONARY JOURNEY

You start life’s grand adventure hitching a ride to your newly named planet on the tail of a meteor. Fortunately the conditions on the planet are just right for an explosion of life in the primordial soup. Unfortunately for you, that explosion means there’s a lot of competition to see which species is going to rule the water.

And the cutthroat competition doesn’t stop once you evolve onto land! Through each of the five stages in Spore it’s survival of the fittest as you try to adapt your species to stay one step, one tool, one weapon ahead of the others. It’s up to you whether your creature will play nice or rough as it advances and evolves. Will your simple amoeba go on to rule the galaxy?

For more information about beginning in the Cell stage and advancing through the other stages, see Starting the Game on p. 3.

NOTE: Once you have completed a stage in your game, you can then start any new game at that stage.
RARES
In the Rares tab, you can see all of the rare artifacts that you have found on your adventures.

TOOLS
In the Tools tab, you can review all of the tools and their attributes that you have collected in each stage of the game. To get more information on a tool, select it.

HISTORY
As you progress through the each stage of Spore, a personal history of your generational path is kept. Click the History icon at the end of the Progress Bar to check how your evolutionary choices and actions are tracking.

CONSEQUENCES
Evolution is a journey in which the choices and actions you make in one game stage have consequences in later stages. The path you take as a microscopic cell, for instance, affects your abilities as a creature. Your actions even have far-reaching reverberations into the future of your species.
At each stage of your evolutionary path, you will make choices that establish your traits. Your traits earn you unique abilities that will serve your future generations. These consequence abilities show up at each stage just above the Progress Bar.

SAVING
You can save your game only while you are actually playing in a stage.
- To save your current game, while playing, click the Options button. Then, click the disc icon. The game is saved.

NOTE: When playing the Space stage, you can only save your game when you are in the solar or interstellar views. While you are in the planet view, the save is disabled.

LOADING
You can load games through the Galaxy screen.
- To load a saved game, click the blue planet that is your homeworld in the Galaxy screen. The game is loaded.

TRACKING PROGRESS
Each stage presents a set of goals or missions which, if accomplished, help you to complete the stage. During the course of a stage, you can monitor your progress towards mastering individual goals in order to complete the stage.

PROGRESS BAR
1) Progress so far
2) Milestone
3) Fill the Progress Bar to advance
At the bottom of the screen, you can track your advancement through each stage in the Progress Bar. As you acquire items or achieve milestones in the stage, the Progress Bar fills. When it is completely filled, you can choose to advance to the next stage.
- In each stage, the Progress Bar is filled by successfully completing a different kind of task, such as conquering a tribe or befriending a species.

MINI GOAL CARDS
In the upper-left corner of the game screen, you can see and review the Mini Goal cards. These cards track your current status towards completion of the indicated goal.
- To review the Mission Log containing all of your goals, press L or click the My Collections button, then click the Mission Log tab.

MY COLLECTION
In the My Collection window, you can review different information depending on which stage you are playing:
- In the Cell stage, it shows all of the parts you have collected.
- In the Creature stage, it shows your missions plus all of the parts you have collected.
- In the Tribe stage, it shows your missions plus all of the tools and accessories you have collected.
- In the Civilization stage, it shows only your missions.
- In the Space stage, it shows missions plus badges, rares, and tools.

NOTE: Some tabs may not be available in the stage of your current game.
- To close the My Collection window, click the X icon in the upper-right corner.

MISSION LOG
In the Mission Log, you can review detailed information about all the goals and missions that are currently open. You can also browse your glorious history of missions and conquests.
- To delete a mission in the Space stage, select it in the list, and click the garbage can icon.

BADGES
In the Badges tab, you can review all of the badges that you have collected for each rank you have attained.
- To see the list of collected badges, click the appropriate rank. Then, move the mouse over the badge to review.

1) Creation’s behavior path through time
2) Milestone/Event
3) Trait card
4) Consequence ability you’ve earned (mouse over ability for more information)
5) Game clock
6) Click to close history.
7) Use the scroll bar or scroll the mouse wheel to see more of the timeline.

To toggle display of the history, press T.
The tables below show which traits you can establish at each stage and the consequence abilities those traits unlock in subsequent stages.

### CELL STAGE

<table>
<thead>
<tr>
<th>Trait</th>
<th>Creature Stage Consequence Abilities</th>
<th>Tribe Stage Consequence Abilities</th>
<th>Civ Stage Consequence Abilities</th>
<th>Space Stage Consequence Abilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Carnivore</td>
<td>Raging Roar: Surrounding creatures run in fear for a limited time.</td>
<td>Traps: Chieflain lays traps that attack and poison wild animals.</td>
<td>Invulnerability: Vehicles take no damage for a duration.</td>
<td>Power Monger: Increased energy capacity.</td>
</tr>
<tr>
<td>Herbivore</td>
<td>Siren Song: Surrounding creatures are enchanted with you for a limited time.</td>
<td>Refreshing Storm: Chieflain summons a storm; trees are replenished and fruit falls from the trees.</td>
<td>Healing Aura: Repairs your vehicles.</td>
<td>Social Suave: Cheaper social tools.</td>
</tr>
<tr>
<td>Omnivore</td>
<td>Summon Flock: Summon a flock of creatures to help you socialize and fight for a limited time.</td>
<td>Flying Fish: Chieflain summons a creature from the deep that sends fish flying out of the sea.</td>
<td>Static Bomb: Freezes vehicles, turrets and buildings.</td>
<td>Gentle Generalist: Cheaper passive tools.</td>
</tr>

<td>Military</td>
<td>Pirates-B-Gone: Decreased rate of raids.</td>
</tr>
<tr>
<td>Economic</td>
<td>Spice Savant: Increased spice production.</td>
</tr>
<tr>
<td>Religious</td>
<td>Green Keeper: Decreased rate of biodisasters.</td>
</tr>
</tbody>
</table>

### SPACE STAGE

In the Space stage, the traits that you earned throughout your race’s history now play a role in the form of a philosophy that determines the ease with which you use certain tactics in your exploration of the galaxy. This philosophy also determines unique tools that your empire will have at its disposal. These tools are available to you upon entry into the Space stage and can be found in your spaceship tools. These tools are indicated with a special border treatment on the tool icon.

Your race’s philosophy is not set in stone, however. If you find another race whose philosophy intrigues you, you may decide to adopt their beliefs. Accept a mission that explores this race’s philosophy and you will earn the ability to change.
SPORE CREATORS

There are two main tools for exploring your creative side and filling your Spore universe with incredible creations. The Spore Creators let you build everything from simple cell creatures to amazing spacecraft. The Planners allow you to design your tribal village, city, or space colony any way you see fit.

UNLEASH YOUR CREATIVITY

The Spore Creators are your toolkit for creating anything you can imagine in the Spore universe, from cells to creatures to spaceships and more. The Spore Creators share many elements but have some differences as well. You can access any of them from the Galaxy screen, or access each stage’s specific creator in-game when playing that stage.

During the game, you can capture Spore scenes in the game or in Test Drive mode in the Spore Creators.

During the Space stage, mouse over any of your colony’s City Halls to access the Colony Planner. During the Civilization stage, mouse over the City Hall to access the City Planner. During the Tribe stage, mouse over the tribal hut to access the Tribal Planner. During the Cell or Creature stages, mate with another member of your species. The following Creature Creator screen highlights some of the common elements for all Spore Creators.

During the game, you can capture static screenshots or shoot movies of in-game action.

OPTIONS

From the Galaxy screen or in the game, you can access the Options menu by clicking the Options icon in the lower-left corner. The Spy Glass and Ban options are not accessible when you’re in the Cell stage, in any creator, or on the Galaxy screen.

For information on settings, see the in-game Spore Guide.

SCREEN CAPTURES AND MOVIES

You can capture Spore scenes in the game or in Test Drive mode in the Spore Creators. You can also enter any of the Spore Creators from the Sporepedia. Select any Spore creation by clicking it and then click the Creator button that appears.

To open a Spore Creator during the game:
- During the Cell or Creature stages, mate with another member of your species.
- During the Tribe stage, mouse over the tribal hut to access the Tribal Planner.
- During the Civilization stage, mouse over the City Hall to access the City Planner.
- During the Space stage, mouse over any of your colony’s City Halls to access the Colony Planner.

NOTE: The Spy Glass and Ban options are not accessible when you’re in the Cell stage, in any creator, or on the Galaxy screen.

For more information on capturing in the Spore Creator, see Test Drive Mode on p. 22.
**SPORE CREATOR CAMERA CONTROLS**

Moving the camera is easy. These controls work in all three Spore Creator modes: Build, Test Drive, and Paint.

**USING THE INTERFACE BUTTONS:**
- ! Rotate the camera around your creation.
- # Zoom the camera in and out.

**USING THE MOUSE:**
Right-click and drag the background to rotate the camera around the creation.
Hold down SHIFThand scroll the middle mouse wheel to zoom in and out.

**USING THE KEYBOARD:**
The + and - keys zoom in and out.
The < and > keys rotate the camera around the creation.

**NAMING YOUR CREATION**
You can't let your creature go into the world without a name.
1. Click the Name Your creature textbox in the middle-bottom area of the screen.
2. In the pop-up, enter a new name for your creation.
3. For a description, you can provide a short bio including your creation's towering achievements.
4. In the Tag field, enter one- or two-word tags separated by commas—these tags are the search terms to help you and other players find your creations on www.spore.com or in the Sporepedia.
5. To close the pop-up, click the down arrow.

**SAVING YOUR CREATION**
You can save your creation in any mode (Build, Paint, or Test Drive). If you entered the Spore Creator from in-game, click the accept icon to save your creation. Otherwise, click the Save icon to save the creation and keep working on it, or click the Save and Exit icon to save the creation and exit to the Sporepedia. Your creation is saved.
You can revisit any of your saved creations in the Sporepedia under My Creations, or find the files here:
My Documents (or Documents)/My Spore Creations.

**NOTE:**
- You must give your creature a mouth and a name before you can save it. Your baby's gotta eat.
- You cannot save a creation with a name that was originally created by a different player under the same name.
- If you entered the Spore Creator from the Galaxy screen, you are returned to the Sporepedia. Your new creation is under the My Creations header.

**BUILD MODE**
In Build mode, you add and remove parts from the palette of available part categories. During gameplay, you may find new parts or unlock access to parts, which can then be added through the Spore Creator. These new parts are available in the appropriate tabbed category of the parts palette.
In the upper-right corner of the Spore Creator screen, you may see your creation's abilities. When you mouse-over a part, you can see the abilities that it affects.

**NOTE:** Buildings and Spaceships do not have abilities.
- To see the cost and benefits of a part, move the mouse cursor over it.

**TIP:**
Decisions you make for your creation in one game can influence the next game. For example, if you choose an herbivore's mouth in the Creature stage, your creature will always be an herbivore.
- To start building a new creation, click CTRL+N.

**CAMERA CONTROLS**
Use the rotate buttons or left-click-and-hold and drag the dais to move the camera around your creature.
Press += or hold down SHIFThand scroll the mouse wheel to zoom in/out on your creature.

**TORSO SELECTION**
Select a new torso to start with by clicking the New Creation button. Please note that if you made any changes, you will be prompted to save first, and then a new torso type will be available for you to start with.

**PARTS PALETTE**
To select a part category (mouths, eyes, details, etc.) click its icon at the top of the parts palette on the left side of the screen.

- 1) Click to open category
- 2) Available part
- 3) Unavailable part (too expensive/complex to add)
- 4) New part

When Build mode is selected, the selected category of parts is displayed on the left side of the screen. In each category, available parts are displayed in full detail, while unavailable parts are shown as an empty shield icon. Parts that have become available since your last visit to the Spore Creator are highlighted. In any category, the rightmost parts that are available are the best and most expensive ones.

**ADDING PARTS**
1. Click and drag the available part from the palette onto a location on your creation. As soon as you begin to drag the part, the cost is subtracted from your total currency.
2. If you place the part on the centerline of your creation, only one part is to be added. If it's placed off-center, two parts are added at the same cost.
3. To place the part in the selected location, release the mouse button.
4. The part is placed, and your health, abilities, or both are changed based on the part's capabilities.
5. After you place the part, you can adjust its size, rotation, or position on your creation.

**BUDGETING**
Designing the right creation for the current challenges in the game is an art unto itself—and a lot of fun. To get the right mix of abilities and cost, you should experiment with all kinds of parts in the Spore Creator.

**NOTE:**
- Painting your creation does not cost anything, so there's no need to budget for it.
- During the course of a stage, you may need to visit the Spore Creator to make frequent changes to your creation. Remember when building your creation that you can always sell back a part to regain the funds you paid for it.
- If you make a mistake, you can always undo it. See Undo/Redo on p. 17.
Complexity Meter
In all Spore Creators, your creation has a limit to its complexity. Adding parts increases complexity, and you cannot add parts to exceed the maximum complexity.

Depending on the stage, you may be using DNA, Sporebucks, or other currency to purchase new parts.

The amount of currency you have available is displayed in the bottom of the parts palette in Build mode.

REMOVING PARTS
1. Click and drag the part off your creation. You can also click the part and press BACKSPACE or DELETE.
2. The part is removed. Your currency is increased by the cost of the part, and your creation’s health, abilities, or both are changed accordingly.

EDITING PARTS
After you have added a part to your creation, you can change its size, rotational position, or even shape. Experiment with the part controls in the Spore Creator to become familiar with how they work. Don’t worry: you can always undo your changes. See Undo/Redo on p. 17.

To manipulate a part, select it. Its blue editing handles are displayed and can now be manipulated.

- Click and drag adjustment arrows to push or pull the part along its height, width, or length or to lengthen its curl.
- The position ball indicates the direction where the part is facing. To change its direction, click and drag the position ball.
- Click and drag along the rotation ring to rotate the part.

SCALING PARTS
To scale the size of the entire part, select it and scroll the middle mouse button or press the Up Arrow or Down Arrow to change its size.

PAINT MODE
In Paint mode, you can paint individual parts or your entire creation from a palette of colors, textures, and themes. It’s time to add a little color to its life.

To enter Paint mode, click the paintbrush icon at the top of the screen. The Paint palette is displayed on the right side of the screen.

Paint your creature using one of three methods:
1. Select a style.
2. Use the Paint Like feature to copy the paint style of one of your previous creations.
3. Use Paintbrush mode to apply specific textures and colors of your choice in three layers: base, coat, and detail.

Painting Complete Styles
You can paint your entire creation in a single stroke. In the Complete Styles tab, you can click one of the displayed themes to paint your entire creation.

1) Selected style
2) Click arrows to see more styles
3) Paint like

Paint Like
You can paint your creation to match other creations that you’ve seen in the Sporepedia.

To paint your creation like another:
1. Click the Paintbrush Mode tab.
2. Click the Paint Like option in the Complete Styles palette to access the Sporepedia.
3. Select the creation whose paint style you’d like to copy. Click the accept icon.
4. You return to Paint mode. Your creation has been updated with the paint style of the Sporepedia selection.
PAINTING LAYERS

In the Partial Styles tab, you can select the paint themes and colors on individual layers of your creation. For each layer, you can select a theme and a color. It’s a good idea to choose the style first and the color second.

1. Click to open palette for other layers
2. Click to paint theme on current layer
3. Click to change the color of the painted theme
4. Click arrows to see more themes
5. Return style to its original color

To paint layers:
In general, there are three paint layers to a creation: Base layer, Coat layer, and Detail layer. Depending on the specific Spore Creator, these layers have different names.

Base
The Base layer determines the creation’s underlying and overall style and color.

Coat
The Coat layers are applied on top of your creation’s base color.

Detail
The Detail layer adds a detail pattern in a wide range of styles.

1. Click the Partial Styles tab.
2. Click the layer to paint. Select the Base layer first.
3. Choose the partial theme to paint on the selected layer. Use the arrows to review all available themes. Click the desired theme, and your creation is updated.
4. If desired, select a different color from the displayed palette. Click and hold the color to see a palette of shades of the selected color. Click the preferred shade.
5. Repeat the above steps for the other two layers (Coat and Detail).

PAINTBRUSH MODE

In Paintbrush Mode (not available in Cell or Creature Creators), you can paint specific colors or patterns onto individual pieces of your creation.

1. Selected pattern’s editable color (if two colors appear here, you can select two colors for that pattern)
2. Selected pattern
3. Click to change the color of the selected pattern
4. Click arrows to see more patterns
5. Return style to its original color

UNDO/REDO

If you make a mistake in the Spore Creator, you can undo your most recent changes.

1. To undo any change, click the arrow pointing to the left in the bottom-right corner of the Spore Creator.
2. To redo the last edit, click the arrow pointing to the right.

SHARING YOUR CREATIONS

You can share your creation with the entire universe of Spore players. You can send creations directly to friends and family or publish it to the Spore community over the Internet through www.spore.com.

- You can share directly from the Spore Creator, as well (p. 11).
- You can also share photos and movies of your creature taken in the Spore Creator.

For more information, see Photos on p. 23.
**PUBLISHING YOUR CREATION TO SPORE.COM**
Before you publish your creation, you should verify that tags have been added to the creation to help players to find it. See Naming Your Creation on p. 12.

- You might consider including your creation in a personal Sporecast of items that you have created.
- For more information, see Sporecasts on p. 54.

1. In the Sporepedia, click MY CREATIONS on the left side of the screen.
2. Select the creation to publish.
3. Click the Share icon.

**EMAILING YOUR CREATION TO FRIENDS**
If you do not want to publish your creation to the entire Spore universe, you can email it to selected outposts.

To send your creation to your friends:

1. On your local hard drive, navigate to the following directory:
   My Documents (or Documents)\My Spore Creations
   **NOTE:** The above path refers to the default location for your Spore creations on Windows. If you did not accept the default locations, your path is different.
2. Select the category that contains the creation to email.
3. Locate the .PNG file for your creation. Email this file.
4. To install an emailed creation, save the .PNG file to your desktop. Drag and drop it into the appropriate Spore Creator.
   **NOTE:** To use the creation in the game, save the .PNG file into the directory listed above on your computer. The next time you start Spore, the creation will be in the Sporepedia under the Everything tab.

**CELL CREATOR**
In the Cell stage, you may collect parts from other cells or from meteor fragments. The DNA points you accumulate through eating can be spent on parts to add capabilities to your cell in the Cell Creator.

At any time during the Cell stage you can call a mate, using your Mating Call button. Once you call, your mate responds. Swim to the mate. After a beautiful courtship ritual, an egg is produced and you are transported to the Cell Creator.

Adding parts to your cell gives it new abilities or improves on current ones. Your cells abilities are displayed in the upper-right corner of the Cell Creator.

- If the part is highlighted in red before you drop it, it cannot be placed in that location.
- **NOTE:** For information about all the available parts in the Cell Creator (mouths, eyes, weapons, and more), see the in-game Spore Guide.

**DIET**
The kind of mouth you select determines the diet of your creature and is a key factor in how you play Spore. If you select a filter mouth, your creature is an herbivore and can only eat plant matter. Carnivores must consume meat, and omnivores can eat both.

PART CATEGORIES
In the Creature Creator, the parts palette contains many categories filled with a broad array of parts.

1) LIMBS
You may need to reposition the torso to get the limbs in the proper location. Position your creature facing forward or away from you to move the joints of the limbs closer or further from its body. Position it facing sideways to move the joints of the limbs higher or lower in relation to your creature’s torso.
- To resize a joint, click it and scroll the mouse wheel.

2) GRASPERS AND FEET
Each limb includes a grasper or foot, but it can be replaced as needed. The end of an arm or leg is the only place where you can place a grasper or foot.
- To replace a grasper or foot, click and drag the item off of the limb of your creature. The part is removed, and your DNA points are increased. You can then add a preferred grasper or foot.

3) SHAPING THE SPINE
In the Creature Creator, you can manipulate the size, shape, and angle of the spine. To display the vertebrae of your creature’s spine, click the torso. The resizing handles appear at each end of the spine.

4) ADD LENGTH
- To lengthen the torso by adding vertebrae, click and drag a handle in the direction where the spine is pointing. You can shorten the torso by dragging the handle in the opposite direction.

5) BENDING THE BODY
- To curl the end of the torso, click and drag a handle away from the line of the spine.
- To bend the spine, click and drag an individual vertebra. Make small adjustments one vertebra at a time.

6) SIZING PARTS AND BODY
The mouse wheel gives you the freedom to adjust the scale of any body part. Select a part and then scroll the mouse wheel to increase/decrease scale.
- To resize the torso, move your mouse over a vertebra where you want to fatten or thin the torso. Then, scroll the mouse wheel up or down, or you can press the Up Arrow or Down Arrow. The width of the torso around the vertebrae changes.

7) ADDITIONAL BUILD FEATURES
ADDITIONAL PART HANDLES
You can access additional part handles after placing a part on your creature by selecting that part and holding down TAB. Additional part handles appear, allowing greater control of the placement of each part.

CLONING PARTS
To clone an existing part on your creation, select it and press ALT. Your currency total is decreased by the cost of the part.
- If a part is along the centerline of your creation, you can drag it off the centerline to create a second instance of the part on the other side of the creation. This type of duplication has no cost.

ADDITIONAL LIMBS CONTROLS
- To remove a section of a limb, press CTRL and click between two joints. You cannot remove the shoulder or hip joint.
- To join a new limb to the remaining joints of a limb on your creature’s torso, press CTRL and drag the limb to join them.
TEST DRIVE MODE

1) Click to enter Test Drive mode
2) Picture viewer
3) Take pictures
4) Create an animated avatar
5) Take movies
6) Play animations
7) Change backgrounds
8) See babies
9) Camera controls
10) Click an animation button to have your creature perform that animation

In Test Drive mode, you can preview your creature in action before leaving the Creature Creator. Make your creature show you all new tricks, as it poses, backflips, flirts, laughs, cries, and carries on.

To enter Test Drive mode, click the two-paw icon at the top of the Spore Creator.

MOVEMENT
To move your creature around in the Test Drive circle, click a location. Your creature ambles to the new spot.

To make your creature run, double-click a location.

To get your creature’s attention, click the whistle icon.

PLAY ANIMATIONS
Click the Actions icon to open your movement options. In the animations panel, you can review action, dance, response, and mood animations.

BACKGROUNDS
You can change the current background, as needed. Click the backgrounds icon to see a variety of backgrounds to display in the Test Drive area.

The black background displays your creature in empty black space. You can use this background for taking close-up pictures of your creature.

BABIES
To see your creature’s baby self, click the babies icon. Your creature’s babies imitate actions, and they may mess up from time to time. You can display up to three babies at any time.

To make a baby disappear, click its icon again.

PHOTOS
You can take pictures of your creature in action. Click to take a photo.

After the flash, the picture is stored in the following location: My Documents (or Documents)/My Spore Creations/Pictures

Changing Picture Resolution
You can change the resolution of captured photos. In the Settings menu, you can choose from Small, Medium, or Large resolution photos.

Managing Photos
After you’ve taken photos, you can manage them through the Picture Viewer.

In the Picture Viewer, you can see all photos that you have taken in one or more film strips.

To see other strips of pictures, click the arrow buttons at the bottom of the Picture Viewer.

To email a photo, click it.

The Picture Viewer has a limit of 99 photos. After you reach this limit, you can store your captured photos in another directory or delete them to free up space.

Click to archive or delete all photos.

Click ARCHIVE ALL to move your photos to a backup directory inside the Spore pictures directory.

PHOTOS
You can take pictures of your creature in action. Click to take a photo.

After the flash, the picture is stored in the following location: My Documents (or Documents)/My Spore Creations/Pictures

Changing Picture Resolution
You can change the resolution of captured photos. In the Settings menu, you can choose from Small, Medium, or Large resolution photos.

Managing Photos
After you’ve taken photos, you can manage them through the Picture Viewer.

In the Picture Viewer, you can see all photos that you have taken in one or more film strips.

To see other strips of pictures, click the arrow buttons at the bottom of the Picture Viewer.

To email a photo, click it.

The Picture Viewer has a limit of 99 photos. After you reach this limit, you can store your captured photos in another directory or delete them to free up space.

Click to archive or delete all photos.

Click ARCHIVE ALL to move your photos to a backup directory inside the Spore pictures directory.

Postcards
Send a Spore postcard to a friend! You can email a photo postcard to your friend directly from the Picture Viewer.

To email a photo:

1. In the Picture Viewer, click the photo to email.
2. Enter your email address and your friend’s email address.
3. Add a message to the postcard.
4. To send the email, click the envelope icon.
5. To delete the individual image, click the trash can icon.
6. To archive the image to the backup directory, click the disc icon.

MAKING MOVIES
You can capture movies of your creature in action in the Test Drive area. These movies are saved to your local computer for your enjoyment.

Click to begin filming. Select animations or actions for your creature to perform. Click again to stop the camera.

To make a movie disappear, click the two-paw icon again.

Movies can be up to two minutes in length.

After you stop the camera, your movie is saved in the following directory: My Documents (or Documents)/My Spore Creations/Movies

Changing Movie Size
You can adjust the movie resolution settings in the in-game Settings screen.

NOTE: Movies taken at a high resolution occupy more disk space.

Post a Movie to YouTube
After the movie has been saved to your computer, you can choose to immediately upload it to YouTube®. Click UPLOAD.

NOTE: To use the upload feature, you must be a registered user of Spore and logged into your existing YouTube account.
BUILDING BUILD MODE

When you open the Building Creator, you begin in Build mode, where you can add new block parts to your building. Along the top of the left side of the screen, you can select an icon to open one of the following categories: Roofs, Bodies, Connectors, Windows, Doors, Details, and Function.

**NOTE:** There are limits to the height and width of any building.

**Blocks**
After you have added a block to the building, you can edit it using the handles. Click the block to see them.
- To remove a block, select the block and press DELETE or BACKSPACE. Or, click and drag it off the building.
- You can also stack or intersect blocks. To intersect blocks, drag one into another. To stack blocks, drag one completely over another and it stacks automatically.

**Snap-To**
Windows and doors have a snap-to function. Once you place one, all subsequent windows and doors snap into alignment. If you don’t like where the window or door snaps to, simply move it where you want it to go.

**Directional Placement**
After you have placed a part, you can move it along specific axes.
- To move a part vertically, press and hold CTRL while you click a part and reposition it with your mouse.
- To move a part across the surface of the dais, press and hold SHIFT while you click a part and reposition it with your mouse.

**Additional Part Handles**
After you have placed a block part on your building, you can access additional part handles.
- To use the additional handles, click the part and press TAB. These handles allow greater control of block placement.

**Copying Blocks**
You can copy parts using the ALT key. See Cloning Parts on p. 21.

**Completeness and Budget**
Each block that you add costs block points and adds complexity to your building. If you run out of block points, you cannot add blocks until you remove some first.

In the upper-right corner of the screen, this meter indicates the overall complexity of your tribal outfit. You cannot exceed the complexity limit.

**OUTFITTER BUILD MODE**

In Build mode, you can add and remove pieces of outfit to your creature. Mouse over a part to see how it affects your combat, armor, and more. Some chest parts, for example, contain pouches for gathering.

To add to the outfit, click and drag a part to the appropriate location on your creature. For more information, see Adding Parts on p. 26.

In Paint mode, you can paint complete themes or partial themes onto your new outfit.

**OUTFIT COMPLEXITY BUDGETING**

As you add more items to your outfit, the Complexity Meter increases for your tribe. Displayed in the upper-right corner of the screens, this meter indicates the overall complexity of your tribal outfit. You cannot exceed the complexity limit.

**BUILDING CREATOR**

In the Civilization stage, you create the infrastructure and fleet to expand your city into a terrestrial empire via the City Planner. Create a wide variety of buildings that show off your city’s power and influence, and a wide range of vehicles that strike the right balance between speed, attacking power, and health.

In addition to creating and purchasing buildings and vehicles, the City Planner also allows you to place city decorations, create your city anthem, access the Outfitter, and design your city layout.

For more information on the City Planner, see p. 27.

The Building Creator lets you construct new buildings for your city, including your palatial City Hall. While each type of building has a specific function to serve the city, its size, shape, and color scheme is for your creating pleasure. To save it, your building must have three building blocks and a name.
- To open the Building Creator, click your City Hall.
- You can create buildings in any of the following categories: City Hall, House, Entertainment, and Factories. See City Layout on p. 28 for more information.

**City Hall**
Each city needs a City Hall, which serves as the center of city life. If your City Hall falls, the entire city falls.
Painting Multiple Parts or Regions
Each block is made up of a few regions. CTRL and SHIFT let you control which regions you paint.
SHIFT Allows you to paint all the regions on the block highlighted by your cursor.
CTRL Gives you control to paint regions on various blocks. The CTRL key gives you two options:
- To paint the same region on all blocks, press 1. Then hold CTRL and move the mouse cursor over
the region on the block you want to paint.
- To paint the same region on all blocks that are identical, press 2. Then hold CTRL and move the
mouse cursor over the region on the block you want to paint.

Eyedropper
You can use the eyedropper to select colors, textures, and patterns for use in painting other parts of your
building. You can use the following commands to activate the eyedropper to acquire color, texture, or both.
Color only Press 3. Press and hold ALT. Select a painted block.
Texture only Press 4. Press and hold ALT. Select a painted block.
Color and texture Press 5. Press and hold ALT. Select a painted block.

VEHICLE CREATORS
In the Vehicle Creator, you can build new vehicles to meet your global objectives. You can create land,
sea, and air vehicles (see p. 44) in the Civilization stage and colony vehicles and spaceships (see p. 46)
in the Space stage.
NOTE Colony vehicles appear automatically as your space colonies develop. You can create and
customize your own colony vehicles on each planet.

LAND, SEA, AND AIR VEHICLES
To open the Vehicle Creator in-game, click your City Hall.
When you begin the Civilization stage, you have a fixed budget of block points with which to build your first vehicle.
You can create economic, military, or religious vehicles in any of the following categories: land, sea, and air.
NOTE When you begin the Civilization stage, you may not build air vehicles. You can access other
types of vehicles when you capture other cities.

ADDING PARTS
To add a new part to your vehicle:
Adding parts to your vehicle is similar to adding parts to a creature (p. 13). Two parts may intersect. Body
and cockpit parts automatically align down the center of the vehicle.
NOTE There are limits to the height and width of any vehicle.
- To move the entire vehicle, press and hold SHIFT while moving the mouse.
- For more information on removing parts, see Removing Parts on p. 14.
- You can copy parts using the ALT key or access additional part handles using the TAB key. See
Additional Build Features on p. 21.

SPACESHIPS
Building a spaceship is the same as building a land, sea, or air vehicle. The parts palette categories for
the Spaceship Creator are Bodies, Cockpit, Space, Land, Water, Air, Weapons, Effect, and Detail. All of
these categories can be found in the Vehicle Creators except Space, which contains parts that assist your
ship in space travel.

PAINTING YOUR VEHICLE
In Paint mode, you can apply a little color and texture to your new galactic wanderer.
- To open Paint mode, click the paintbrush icon at the top of the screen.
- It’s a good idea to choose the style first before choosing the color. You can paint your vehicle in one of three
For general information on painting specific colors and patterns, see Paintbrush Mode on p. 17.
CITY LAYOUT

The layout of each city affects the happiness and productivity of your people. Planning your city requires that you pay attention to where you place the different types of buildings. Putting buildings of one type next to another may increase productivity, but it may also decrease happiness.

- **NOTE**: Pay attention to the happiness of your citizens. Unhappy cities generate less cash and may collapse into rioting. Unhappy cities are also more vulnerable to religious conversion.

- **Houses**: Create links from houses to entertainment buildings and factories to boost overall productivity and happiness in your city. Your City Hall counts as a house in your overall city stats.

- **Entertainment Buildings**: Increased happiness, but too much entertainment could lead to less productivity.

- **Factories**: Higher productivity but lower happiness.

- **Turrets**: Protect your individual cities from attack. Turrets mounted on city walls automatically targets approaching vehicles from any nation that is at war with you.

- **Decorations**: No effect on happiness or productivity.

BUDGETING WITH SPOREBUCKS

Buildings and vehicles are purchased with Sporebucks, the currency of the Civilization stage. To add new buildings and vehicles to your city, you must generate a steady source of Sporebucks. With sources of income, you can buy and improve your buildings and vehicles.

- **Houses**: Create links from houses to entertainment buildings and factories to boost overall productivity and happiness in your city. Your City Hall counts as a house in your overall city stats.

- **Outfits**: In the City Planner, you can create outfits for your citizens to give them a dash of style. For more information, see Outfitters on p. 24.

NATIONAL ANTHEM

Through the City Planner, you can design your own anthem for your city. When your city is displayed on-screen, you can hear the national anthem. As you conquer other cities, they play your national anthem, whether they like it or not.

Through the Anthem Composer, you can define the Beat, Anthem, and Ambience to shape your city sound. You can also define the playback volume of each part to create your own mix.

- **Ambience**: played in the background wherever you explore in the planet. However, any city music takes precedence in playback over the global ambience.
- **Beat**: defined within the Anthem Composer screen and set up in the order that you should define them. For more information about Beat, Anthem, Ambience, saving, loading, and sharing anthems, see the in-game Spore Guide.
- **You can also load city music from the Sporepedia.

CREATING YOUR OWN MELODY

1. Click to generate random melody
2. Toggle auto-playback on/off
3. Click and drag to scale note up/down; scroll mouse wheel to increase/decrease length of highlighted note
4. Click to add/remove selected note from your anthem

You can tweak the anthem or create a new one from scratch or from a random melody. After you have the framework for your melody, you can move the notes in the melody up and down the scale. You can also add and remove notes, as needed.

- **To change the duration of a note, move the mouse over it and scroll the mouse wheel or press the Up Arrow or Down Arrow.

- To restart playback of your melody, click the background of the melody composition panel.

MONITORING YOUR CITY

As you progress through the stage, it’s important to pay attention to what’s happening in each of your cities. For example, cities that are unhappy are more vulnerable to Religious Attacks. An unhappy city is also more prone to citizen protests that could result in stoppages in productions.

- You can review your city’s statistics through the City Planner.

When significant events happen in any city, an entry is added to the event log, which is displayed on the left side of the game screen. Review these notices to keep on top of events happening in other areas of the planet.

COLONY PLANNER

Planning a colony is similar to building a city in the Civilization stage. The Colony Planner operates the same way as the City Planner and allows you to add houses, factories, entertainment buildings, and defenses to your colony to conquer the planet. However, in the Space stage, your colonies produce spice which is then sold for Sporebucks. Colonies also have special rules for how many building they can place in the colonies based on the planet’s TerraScore.
CELL STAGE

In the Cell stage, you begin life’s journey as a single cell and climb the rungs of evolution until you are large enough to hit the beach.
For information on tracking progress and completing the stage, see the in-game Spore Guide.

To reach land:
1. Eat plants or other cells to obtain DNA and grow your cell.
2. Collect parts from other cells and meteor shards.
3. To evolve your cell, spend DNA points on new parts in the Cell Creator.

To point your cell in a different direction, click a new location on the screen. Your cell turns towards that location.

To swim constantly in a direction, click a screen location and hold the mouse button.

PROGRESSING THROUGH THE CELL STAGE

COLLECTING DNA
To obtain DNA, swim into the food, colliding with it with your cell’s mouth.
- Note: To collect food, your cell must have a mouth.

As you eat food, you gain DNA points, which are displayed to the left of the Progress Bar. In the Cell Creator, you can spend these DNA points to add new parts and capabilities to help your cell to evolve.

ADDING PARTS
As you navigate the Cell world, you may discover new parts to add to your cell. These parts may be obtained by swimming over floating meteor fragments or by conquering a peer or prey cell that has a part icon next to its name. Collected parts are available to use the next time you visit the Cell Creator.
- When a part appears in the water, swim over it to collect it.

In the Cell Creator you can drag and drop parts onto your cell. See Spore Creator on p. 11.

After you have collected your first part, the Mating Call button becomes available above the Progress Bar.
- Click the Mating Call button, then swim over to your mate to enter the Cell Creator.

As your cell grows, you need more food to keep it alive and well. You must eat more vegetable matter or, if you’re a carnivore, larger and larger cells (though those cells always have to be the same size as or smaller than your cell).

COMBAT
To protect yourself, you can add offensive weapons, like a carnivorous mouth. Or you can add spikes to your cell to protect it from pursuing attackers.
- To attack another cell, collide your attacking part with the cell while avoiding the cell’s dangerous parts.
- To defend your cell from another’s attack, position your defensive parts, such as spikes, so that they hit the cell when it attacks.

Your cell is displayed in the middle of the Cell stage screen. All around you are green pieces of plant life to eat if you are an herbivore, other cells to avoid or eat if you are a carnivore, parts to collect, and various primordial bits to avoid.
CREATURE STAGE

Land ho! In the Creature stage, your creature crawls from the primordial sea to establish a beachhead among the landed species of the planet. As you explore the world, you encounter a wide range of other species, some friendly and some less so. You must develop your social skills to make new friends and/or your combat skills to handle your enemies. Along the way, you gain DNA points, which you can use to evolve your creature, gain intelligence, and complete the journey to becoming a sentient creature and advance to the Tribe stage.

- For Creature stage controls, see p. 33.
- If you die during gameplay, you are reborn at your home nest.

For information on tracking progress and completing the stage, see the in-game Spore Guide.

NOTE: After you complete the Creature stage, you are no longer able to alter the physical attributes of your creature.

CREATURE CONTROLS

In the Creature stage, you move about the world by pointing at locations on-screen. Your creature moves to the indicated spot and waits for your next command.

- To move continuously, click and hold on a spot on-screen. Move the cursor to change the direction of your creature.
- If your creature has graspers, you can pick up objects off the ground trees. To collect an object, click it.
- You need to eat regularly to keep your creature energized. See Care and Feeding on p. 34.
- You can reposition the camera as you see fit by holding down the right mouse button and moving the mouse.

</table>

NOTE: In the Creature stage, you do more than swim. Useful moves such as the ability to sneak, jump, or glide may shorten the evolutionary road.
The Creature stage, you do not have to protect your nest. If your creature dies, it is reborn at your home nest.

**NOTE**
You can always try to turn and run away. You can also use any other abilities, like Sneak, to escape.

When you mate at your nest, you enter the Spore Creator and can add or remove parts.

The creature.

At your nest, you can rest and recuperate and mate and evolve your species. If you are hurt in battle, you can return to your nest to heal. Sit in the nest and wait until your Health meter is replenished.

If you have graspers, you can grab items and throw them at another creature—some items will stun a carnivore. You also gain DNA points, and occasionally a new part. Defeating a creature in combat degrades your relationship with all creatures of the same species.

If you successfully defeat the creature, you can retrieve meat, which you can use for food if you're hungry.

Each combat ability has five levels. Combat abilities are gained or improved by adding parts in the Spore Creator.

Consequence abilities are located above your Progress Bar. They pack a punch when used, but take some time to recharge. For more information about consequence abilities, see p. 7.

Gaining Intelligence
When you gain enough DNA to fill the Progress Bar across a vertical milestone line, you automatically jump to the next intelligence level.

Your consequence abilities are located above your Progress Bar. They pack a punch when used, but take some time to recharge. For more information about consequence abilities, see p. 7.

Evolving Your Creature
Evolving your creature requires acquiring sufficient DNA points to spend on parts that improve your creature’s abilities. For information on collecting parts and evolving your creature, see the in-game Spore Guide.

Consequence Abilities
In addition to socialization, combat, and movement abilities, you can also acquire special abilities as a result of the choices you make during your evolutionary history. The trait that you earned during your life as a cell is reflected in the consequence ability you now have as a creature.

Your consequence abilities are located above your Progress Bar. They pack a punch when used, but take some time to recharge. For more information about consequence abilities, see p. 7.

Gaining Intelligence
When you gain enough DNA to fill the Progress Bar across a vertical milestone line, you automatically jump to the next intelligence level.

When you gain an intelligence level, you may then add another creature to your pack—up to three creatures.

Developing Your Species
As you gain intelligence, DNA, and friends, you can evolve your creature and expand your influence as you try to become the dominant species on the planet.

Your Nest
At your nest, you can rest and recuperate and mate and evolve your species. If you are hurt in battle, you can return to your nest to heal. Sit in the nest and wait until your Health meter is replenished.

When you mate at your nest, you enter the Spore Creator and can add or remove parts.

**NOTE:** In the Creature stage, you do not have to protect your nest.

Mating
At any time, you can call your mate and produce another offspring. When your egg hatches, you become the offspring, and you learn to use any of your newly added abilities.

To mate, press BACKSPACE or click the Mating Call button just above the Progress Bar. Follow the call to the mate with hearts swirling around it, then click the mate to enter the Spore Creator. Any changes in the Spore Creator apply to all creatures of your species, including you and your offspring.

**NOTE:** When you call your mate, your mate always responds from your current nest.

Migration
In the search for new food and other resources, your nestmates may migrate from your current nest to a new one.

To locate the new nest after a migration, click the Mating Call button and follow your nestmate’s answering call to the new nest. Or you can follow the path (in-world and on the mini map) to the new nest, or move in the direction of the home icon on the mini map.

Relationships
You can see your current relationship with any species by moving the mouse cursor over a member of that species. For more information on relationship states and icons, see the in-game Spore Guide.

Befriending Other Creatures

Social Stance
To attempt to befriend another creature, double-click it with your social stance active. To have a successful social interaction, you must use your social abilities to mirror the actions of the other creature at a level that is equal or superior to their ability level. For example, if the creature sings to you, then you must use your Sing ability to sing back the same tune or a better one.

If you succeed in filling the meter, your relationship with the other creature improves. If your relationship reaches Friendly or Ally status, you can use the other creatures’ nests to heal.

Social abilities are gained or improved by adding parts in the Creature Creator.

Befriending Alpha creatures of another species is more challenging, but if you succeed, you may be rewarded with a new part.

Ally creatures can be added to your pack, if you have available slots.

**NOTE:** You cannot engage in successful social interactions until you have the specific social abilities used by creatures of a species at the same or a better level. These abilities are acquired by finding parts in the game and then adding them to your species in the Spore Creator.

**NOTE:** You cannot start a social interaction with a creature that you have already impressed. These creatures have a starburst around the relationship icon next to their name.

Combat

Combat Stance
At times, you may have no other option but to fight other creatures. Depending on your type of mouth, you may have to hunt them in order to eat. In combat, you may use one or more combat abilities to defeat the other creature.

To attack a creature, target them with your combat stance active, then click the combat ability to use, or use the keyboard shortcuts 1 through 4.

- Combat abilities are gained or improved by adding parts in the Spore Creator.
- Each combat ability has five levels.

If you successfully defeat the creature, you can retrieve meat, which you can use for food if you’re a carnivore. You also gain DNA points, and occasionally a new part. Defeating a creature in combat degrades your relationship with all creatures of the same species.

- If you have graspers, you can grab items and throw them at another creature—some items will stun the creature.
- You can always try to turn and run away. You can also use any other abilities, like Sneak, to escape.

If your creature dies, it is reborn at your home nest.
BUILDING YOUR PACK

It pays to have a pack. When you gain intelligence, you gain the ability to add another member to your pack. You can add members to your pack from your own species or any species you are allied with. Pack members are loyal followers and willingly help you to attack other creatures, find food, and complete other tasks.

- Add a member to your pack to fill this slot.
- To add a member to your pack, you must gain an intelligence level to open a slot. Then, you must impress another creature (one from your own species or from a species you are allied with) to join your pack. See Befriending Other Creatures on p. 35.
- It pays to socialize in numbers. Having a larger pack helps you to socialize in a friendly way with other creatures.

EPIC CREATURES

Scattered throughout the world are huge, solitary creatures that become the stuff of legend. You may want to observe epic creatures from a safe distance and give them a wide berth.

TRIBE STAGE

In the Tribe stage, your species has gained control of fire and has formed a small tribe. But soon, other tribes develop, too, and they’re all battling to become the first civilization on the planet.

With their new-found intelligence, your tribe’s creatures can begin to build and use tools, which can be helpful in gathering more food to support a larger population and to expand the tribe’s influence. Beware of wild creatures lurking beyond the light of your campfire. Some you may hunt, some you may domesticate, and some may be hunting you.

For information on tracking progress and completing the stage, see the in-game Spore Guide.

The biggest difference between the Tribe stage and the Cell and Creature stages is that you are no longer controlling one member of your species, you’re controlling a whole tribe! Give directions to one or multiple tribe members and have them do your bidding. You can even move the camera around to see what’s going on nearby.

For more information on selecting and commanding tribe members, see Tribe Controls on p. 38. There are also helpful tutorials in-game at the beginning of the stage to get you started.

NOTE: Since you have formed a tribe, you no longer make changes to the size and shape of your species. Now, changes are made to the tools in your village and the outfits your tribe wears.
TRIBAL VILLAGE
Your tribal village is the seed from which your future civilization will sprout. Around the village campfire, you can add more and more tool shacks, each of which provides new tools and capabilities to the village. These tools give your tribe members the ability to forage for food more efficiently, use instruments to enhance their social skills, or use weapons to improve their combat skills.

For more information on the tribal village, see the in-game Spore Guide.

CHIEFTAIN
Most members of your tribe have the same abilities and characteristics, except for the Chieftain. Your Chieftain does not need to equip tools. His staff has the abilities of most of the tools.

You must have your Chieftain selected to perform social interactions with other tribes (you can have additional members of your tribe selected as well).

If your Chieftain dies, he is mysteriously reborn at the hut, ready to lead the tribe again.

TRIBAL LIST
1) Select or deselect all tribe members
2) Chieftain
3) Click box to select tribe member
4) Member's current health and energy levels
5) Current action that this tribe member is performing
6) This tribe member is wounded and needs healing
7) Add Baby button

GATHERING FOOD
The most immediate need of each member of your tribe is food, so you need to get them steady sources of food. A tribe member’s energy level is identified by the orange bar in its icon in the Tribal List.

For information on gathering, hunting, and domestication, see the in-game Spore Guide.

FISHING
You can also gather food by fishing from the sea. Good fishing holes are identified by jumping fish along the shoreline.

HEALING YOUR TRIBE
Tribal living is full of bumps and bruises. When tribe members get hurt in combat, you can heal them in any of the following ways:

Rest
Tribal members can slowly heal themselves if they are allowed to rest at the village.

Healing Rods
If your village does have a healing rods shack, you can equip a tribe member with the healing rod and have your healer go with other tribe members into combat. Your healer then heals your tribe members in the field.
BUILDING YOUR TRIBE
You can build a bigger and stronger tribe by mating to produce babies and acquiring new tools and
accessories through the Tribal Planner.

BABIES
As your tribe grows in prestige by successfully allying with or conquering neighboring tribes, it can
support larger numbers. To increase your tribe’s population, mouse over your tribal hut and click the
Add Baby button.
An egg rolls from the hut (what takes place in the hut stays there). When it hatches, a baby is born.
Babies cost the tribe some food to produce, but once the baby is fully grown, it becomes a selectable
member of your tribe.

TRIBAL PLANNER AND OUTFITTER
In the Tribal Planner, you may purchase new tools (see Tribal Tools on p. 27) for use by your tribe
and outfit your tribe members (see Outfitters on p. 24) with accessories that enhance their
natural abilities.

EQUIPPING TRIBE MEMBERS
After you have purchased a tool, you must send tribe members to the tool shack to get equipped.
● To equip a tribe member, select an individual and then right-click the tool shack. The tribe member
walks to the hut to collect the tool.
● To see the tools used by each member of the tribe, check-out a tribe member’s icon in the Tribal List.

INTERACTING WITH OTHER TRIBES
With each tribe in the world, you have a relationship, which changes over the course of the game. As
you climb the ladder towards civilization, you may choose to dominate smaller tribes by wiping them out,
capturing their resources or allying with them. For larger tribes, you may choose to impress (perform for)
them to build better relationships, leading to an alliance.
NOTE: You cannot perform for tribes that are Angry with or Hostile toward your tribe. You must first
move your relationship to Neutral status by appeasing them with gifts.
Socialize
Attack
Give gifts (diplomatic angle)
Raid (steal food)
For more information on socializing, gifting, building alliances, and attacking other tribes, see the
in-game Spore Guide.

RAIDING OTHER TRIBES
Don’t feel like gathering food from a tree? Raid neighboring tribes for food instead and take advantage
of their hard work.
1. Select members of your tribe to form a raiding party.
2. Equip them with any weapons you have available.
3. Run to a safe location near the tribe’s village. It is often best to wait until the village is
left unattended.
4. Right-click the neighboring tribe’s food stash while in combat stance.
5. Press SPACEBAR to have the camera follow the raiding party on its escapades.
GETTING STARTED

If you are beginning the Civilization stage from the Galaxy screen, follow the on-screen instructions to set up your game, before you follow these steps.

1. Select your City Hall. Make any modifications to it that you would like.
2. Select your first land vehicle. Make any modifications to it that you would like.
3. Your city and vehicle are placed in the game map. Your first objective is to use your vehicle to find a spice geyser and turn it into a productive spice mine.

This objective is displayed in a Mini Goal card in the upper-left corner.

Early in the stage, it may be useful to explore your continent. As you come across new tribes, you may uncover loot and new technologies.

Also, you can recon the other civilizations of the continent to determine the best way to approach them.

Don't forget to continue acquiring spice, building factories, and developing your city.

For information about building out your city, see City Planner on p. 27.

CITY COLOR

Your city's color is assigned at the start of Civilization stage or is inherited if you evolve from the Tribe stage. This color identifies the buildings and vehicles of your nation in the game screen and on the mini map:

• Each neighboring city is run by a faction of your own species. Their colors are blazoned on their walls, buildings, and vehicles.
• When you capture other cities, they adopt your city color and become part of your nation.
• Each city you adopt into your nation may have a different city specialty. You can elect to maintain their specialty or convert them to your own. This decision determines your continued means of expansion: multi-faceted or focused.

CITY BOUNDARIES

The boundaries of your city are marked in the game screen in the color of your city identity. These boundaries demarcate the perimeter of your city and overall claim to the real estate of the globe.

NOTE: If a city is landlocked, it won’t be able to produce sea vehicles. Grab some seaside land if you’re able!

• City and spice geyser boundaries are also visible when you mouse over them in the mini map.

NOTE: When you violate the boundaries of other cities, they may become aware of your entrance and take action.

FINANCING YOUR CIVILIZATION

To conquer the world, you’ll need plenty of Sporebucks. Sources of funds can be acquired in a number of ways in the stage. As your civilization grows, you want to protect your sources of revenue.

MINING SPICE

Scattered throughout the planet are spice geysers, which can be tapped for a steady source of Sporebucks. Spice geysers need to be captured to mine them and turn them into a revenue source.

To capture a spice geyser:

1. Select a vehicle.
2. Right-click a spice geyser to drive to it.
3. The vehicle builds a derrick on top of the node.
4. When the derrick is complete, your spice mine is in operation, and revenue begins adding steadily to your Sporebucks.

NOTE: You need to defend spice geysers with vehicles. Other cities may attack them to tear down your derricks and take away your revenue source. Select the vehicle and choose the stand ground stance. See Vehicle Stand on p. 44.
BUILDING FACTORIES
When you build a factory in your city, you gain a valuable revenue source. Factories are staffed by your citizens, who must be kept happy in order to be productive. Unhappy citizens don’t work very hard.

TRADE RELATIONSHIPS
You can build trade relationships with other cities, which yield steady revenue for both parties. If your relationship is good with another city, you can propose establishing trade routes with other cities by sending economic vehicles to them.
- Other cities may propose trade routes to you. These offers appear through your Communications screen. After you accept a trade route with another city, the economic vehicles from both cities transit back and forth, generating revenue for each. The more economic vehicles you have on the trade routes, the more Sporebucks you’ll rake in.
- When a vehicle is engaged in trade with another city, a trade icon appears over it.
- If you are able to sustain a trade relationship with another city for a while, you may be given the chance to purchase the city, which opens new avenues to revenue and progress.

BUILDING YOUR FLEET
In the Civilization stage, you explore and conquer the globe by building and deploying the best or largest fleet on the planet. At the beginning of the stage, you may only buy or build land vehicles or, if your city is on the coast, sea vehicles. As your nation expands, you may acquire the technology to build air vehicles, before making the great leap into space.
- When you buy or create a vehicle, the weapons available for it automatically align with your choice of strategy: military, religious, or economic.
- You can add a new vehicle through the Vehicle tab of the City Planner.
- Click to open the displayed vehicle for editing in the Vehicle Creator.
- Click to build a vehicle from scratch in the Vehicle Creator.
- Click to download a vehicle from the Sporepedia. If you are not connected online, you may use vehicles in your local version.

FLEET LIMITS
In the Vehicle Planner, you can review your fleet limits, which are displayed just above the city stats. Fleet limits are your current number of vehicles and the maximum number of vehicles of each type that your nation can sustain.
- Fleet limits are defined based on the total number of cities in your nation as well as the number of houses in your cities.

CONTROLLING VEHICLES
You control your vehicles using the same commands that are used to control tribe members in the Tribe stage. See Tribe Controls section on p. 38.
- Define groups of vehicles by selecting multiple vehicles then pressing CTRL plus a number key (the number of the key you press then becomes the group’s number). To cycle through your defined groups, press SPACEBAR.

VEHICLE STANCE
You can assign to individual vehicles a stance, which defines the vehicles basic marching orders.
- To define a vehicle’s stance, select it. Press TAB to switch stances. The following icons become available in the lower-right corner of the screen:
  - The stand ground stance is useful for guarding an area. The assigned vehicle maintains its current position and responds to any challenges from hostile vehicles or cities.
  - The aggressive stance orders the vehicle to actively engage hostile vehicles or cities.

MAINTAINING YOUR FLEET
In the Civilization stage, you must monitor each vehicle’s health, which is displayed as a green bar in the vehicle icon in the Fleet List on the right side of the screen.
- Through the Fleet List, you can access all vehicles in your fleet. It works like the Tribal List in the Tribe stage (p. 39).
- Damaged vehicles can be repaired. Drive the vehicle to the main gate of any city you control. The vehicle begins to heal.

UPGRADING
After you conquer other cities, you acquire access to their technologies and can build their vehicles in any city you control.
- You can upgrade a vehicle with a Superweapon. Click to upgrade a vehicle.
- By capturing other cities, you unlock the ability to build air vehicles.
- Each city of a particular specialty permits you to build a fixed number of vehicles of that type. For example, suppose you control a single military city. You may be permitted to build a total of five military vehicles. If you capture another military city, you may be able to build a total of ten military vehicles.
- If your next city is an economic one, your fleet limits may be ten military and five economic. See Fleet Limits on p. 44.

DECOMMISSIONING VEHICLES
Vehicles that are outdated or no longer effective can be decommissioned at any time.
- To decommission a vehicle, click its icon in the Fleet List on the right side of the screen. Then, click the X in the corner or press DELETE. The vehicle is removed from service, and half the purchase price is returned to your Sporebucks.

RELATIONSHIPS WITH OTHER CITIES
As you interact with other cities, the state of your relationship may improve or degrade. If you are able to maintain a great relationship, you may be offered the opportunity to buy the other city. However, if your relationship becomes hostile, you may find yourself in a state of war.
- You can improve your relationships with other cities by offering trade routes, giving gifts, giving compliments, and assisting them in war when you are asked.
- Your city specialty also factors into how you interact with other cities. You can choose to pursue a military, economic, or religious strategy when attempting to conquer other cities.
For information on relationships, city specialties, and communicating with other cities, see the in-game Spore Guide.

REMNANT TRIBES
At the beginning of the Civilization stage, you may find a number of remnant tribes scattered throughout the planet. These tribal villages are ripe for the taking. If you move quickly, you may be able to acquire valuable things, including new technologies, from these plundered tribes.

CONSEQUENCE SUPERWEAPONS
As you acquire cities that specialize in the military, religious, or economic specialty, you may unlock Superweapon capabilities that are based on the traits you have developed over the course of your evolutionary history. Superweapons require a lot of Sporebucks to use and generate a tremendous strike on a targeted area.
- Each Superweapon that you acquire is available in the Superweapons panel just above the Progress Bar.

CAPTURING A CITY
After you conquer, convert, or purchase another city, it becomes part of your nation, and your national boundaries expand. You then control the city and can build it out through its City Hall by adding buildings or vehicles.
**SPACE STAGE**

We have liftoff! The cosmos are yours. How you choose to advance your race now that you have reached the Space stage is up to you. You may use terraforming technologies to make planets habitable for your people and then settle a colony on them. As your empire spreads across the arms of the galaxy, you encounter other space-faring peoples, who have similar ambitions. You may choose to befriended them or attempt to blast them to smithereens. You may seek out riches on neighboring planets, or journey to the center of the galaxy on a grand, mysterious quest. The future of your race is in your hands, and the vastness of the galaxy is before you. For information on tracking progress and completing the stage, see the in-game Spore Guide.

**GETTING STARTED**

When you have demonstrated your mastery of flight, you are assigned to visit another planet.

1. To launch into orbit above your planet, press - or scroll the mouse wheel. Use these controls to zoom out until you can see the star around which your planet orbits.
2. To move your spaceship to another planet, click it. Your spaceship flies to the other planet.
3. To drop into flight above the planet surface, press + or scroll the mouse wheel.

**EMPIRE IDENTITY**

If you have evolved from the Civilization stage, your race in the Space stage has a trait based on its entire evolution and the choices you made for it along the way. You can, however, adapt your trait as you learn from the other civilizations you encounter on your space travels. For more information on your trait, see Consequences on p. 7.

- If you begin the Space stage from the Galaxy screen, you may select your spaceship, City Hall, and race.

**SPACE MISSIONS**

Space missions may be offered to you by your homeworld or by species that are looking to improve relations. Through the Communications screen, you can accept or reject missions.

If you are able to successfully complete your mission, you may be rewarded with Sporebucks, new tools, and improved relations with the mission requestor. Ultimately, that leads to more badges for you.

**YOUR SPACESHIP**

Your transportation, your weapon, your home—your spaceship is all this and more during your exploration of the galaxy. Treat it well and it will show you the wonders of the galaxy.

**FLIGHT CONTROLS**

**PLANETARY FLIGHT CONTROLS**

When you are flying through the atmosphere, you can use these simple flight controls to get to your destination.

- To apply thrusters on your ship, press and hold the right mouse button.
- The mouse and left mouse button are used for applying your tools.

<table>

STARMAP
In the Starmap, you can move between star systems to explore the cosmos. You can identify star systems of interest using the space filters and then move to the appropriate destination.

1) Your ship's current range (circular halo)
2) Pathway to mission objective
3) Target planet
4) Your homeworld (badge beacon extending up from the galactic plane)
5) Visited star
6) Traveled route
7) Space filters

To get more information about a star system and its planets, move the mouse cursor over a planet.
To focus the camera on your homeworld, press BACKSPACE in Galactic view.

NOTE: Due to range limitations in your spaceship, you may not be able to jump directly to any star. Plot your course as a series of hops.

SPACE FILTERS
In the Starmap, the space filters in the lower-left corner are used to toggle the display of the following types of information.

1) Identifies the star systems where you have colonies
2) The Allies and Enemies filter toggles display of identifiers for the star systems of your allies and your adversaries.

3) The Empires filter toggles display of the known empires of the galaxy.
4) You can use the Missions filter to toggle display of the routes of your currently active mission or missions.
5) This filter displays the pathway that you have followed since your last visit to your homeworld.
6) Identify the star systems that you have visited.

When you drop into orbit above the planet, these tools are replaced with the mini map.

HEALTH AND ENERGY
When your spaceship suffers heavy damage or runs low on the Sporillium that fuels it, navigate to your homeworld or any colony for repairs or to refill. Traveling through the galaxy and using tools both consume a lot of energy. Open your comm unit to place repair or energy orders.
If you get blasted so bad your health hits zero, you are instantly transported to a clone of your ship back on your nearest colony. Now that’s some fancy technology.

NOTE: Traveling while out of energy lowers your health and can lead to an untimely demise.

VISITING PLANETS
To visit a planet in the star system, click it. You can zoom into a planet and fly around it to assess its terrain features and any signs of civilized life.

For information on scanning planets and your cargo bay (including abducting and transporting items), see the in-game Spore Guide.

SOLAR SYSTEM SCREEN
When you leave a planet’s orbit or fly between stars, you are placed among the planets of the star system.

1) Your homeworld (only shows up if you are in your home solar system)—return here for homeworld news, to take on missions, or to refuel or repair
2) Sun
3) You cannot visit gas giants
4) Targeted planet
5) Orbit rings

Hold the right mouse button and drag to rotate the camera view.

When you are flying over the surface of a planet, you can use your spaceship’s tools to learn more, collect samples, terraform, and eliminate threats. See Spaceship Tools above.

To learn more about a planet, move the mouse cursor over it.
To fly to a planet, click it.
To penetrate its atmosphere, press + or scroll the mouse wheel.
To exit the solar system, press - or scroll the mouse wheel.
COLONIZING A PLANET
To become the dominant species, you must build a network of colonies that stretch across the galaxy. Colonies perform the following functions:

Generate Income
Colonies can be plentiful sources of spice, which is turned into Sporebucks that you can spend on building your empire.

Repair and Refuel
You can repair your damaged spaceship and replenish its energy at any colony that you control.

Colony Vehicles
As your empire spreads across the galaxy, you may gain control of additional vehicles. As you improve and develop your colonies, colony vehicles are automatically produced. They are a good indicator as to how well your colonies are doing.

When looking for planets to colonize, you should aim for planets that have a strategic location or are good sources of spice. Targets should be habitable with little or no small terraforming investment.

For information on starting a colony, terraforming planets, and the foodweb, see the Space Stage section of the in-game Spore Guide.

SPACE COMMUNICATIONS
In the Space stage, you must enter a planet’s atmosphere to communicate with the sentient race below.

When you are communicating with a colony of your empire, you can repair your ship or recharge its batteries through the Communications screen. You can also buy goods from the colony.

INCOMING TRANSMISSIONS
At times you receive incoming transmissions from far-off colonies or other alien races. These are always one-way transmissions, which are actually recordings and not live feeds.

You can see incoming transmissions when you are traveling in interstellar space. They are usually preceded by a special event log. Click the event log when in interstellar space to point your ship at the star that is sending the message. There will be a communication icon over the star of the planet who is trying to contact you. Click the star to answer the transmission.

RELATIONSHIPS
Maintaining relationships is an important component of keeping the balance in the galaxy. You can improve your relationship status with other empires by taking on missions on their behalf, giving them gifts, establishing embassies on their planets, helping them out after disasters, or blasting them with the Happy Ray. These actions improve your chances of winning them over.

Relationships degrade when you take any action that can be construed as hostile (e.g., active assault on their colony). This can include using certain powerful tools near another Empire’s system or simply ignoring them for a long period of time. If you’re already on unfriendly terms with an empire, territorial incursions just make things worse. If you’re at war, your colonies and homeworld are susceptible to raids at any time.

STRATEGIES
In the Space stage, you can choose to pursue a military (conqueror), economic (trader), imperial (colonist), or artifact hunter (explorer) strategy in your interactions with other empires. The goal remains the same: conquer them to advance your own.

Although your empire may have more success pursuing the strategy in which it specializes, you may find opportunities where a strategy that mixes elements of each achieves better results.

THE GROX
Beware the Grox. They don’t understand relationships.

COMBAT
During your adventures, you may encounter violent opposition to your intergalactic conquest. So be it.

During combat, you must manage your attacks and defenses against potentially dozens of enemy spaceships. You should pay attention to your health and energy meters during the battle, as well as the stores of available weapons.

For information on fighting spaceships and calling allies, see the in-game Spore Guide.

MILITARY CAPTURE
Each time a colony in a star system surrenders, you advance the system capture bar. Force every colony in the star system to surrender and the entire system will be yours!

Enemy-occupied planets are represented in the system capture panel at the top of the screen.

When the defending system is ready to finally surrender, a CAPTURE SYSTEM button appears in the system capture panel. Click the button to open communications with your enemies. At this point you can choose to accept their surrender, in which case you take possession of the entire system and any colonies left on the planets. If you’re not feeling particularly merciful, reject their offers and wipe them off the planet with your lasers.

NOTE: Sometimes colonies choose to fight until they are destroyed rather than surrender.

REPAIRS
To repair a damaged spaceship, fly to a colony on a friendly planet and open the Communications screen to see repair and recharge options.

You may also discover mega-repair packs and other useful tools during exploration. These tools are in the Weapons tab of your spaceship tools (p. 49).

TRADING
Trade with your own colonies as well as with alien races to keep your space program thriving.

Establish trade routes with alien races (provided you’re on friendly terms) to transport spice between star systems. Maintaining the trade route ensures that your relationship with that race will continue to increase.

For information on trading, establishing trade routes, and star system buy-outs, see the in-game Spore Guide.

COLLECTIBLES
Scattered throughout the galaxy are artifacts of incredible rarity and value. Some missions may ask you to find specific artifacts. At other times, you may make a happy discovery while exploring a planet. All collectibles can be sold for healthy prices. Some can be placed inside colonies as decorations.

Some collectibles are part of a collection. If you find all items in the collection, you may receive a special badge and extra compensation for having the entire collection.

SPICE
Spice is the most sought-after resource in the galaxy. It powers cities, colonies, vehicles, and ships. It’s responsible for making poor empires rich, corrupting the innocent, and sparking interstellar wars. Most will do whatever it takes to acquire it and pay big money to whomever has it.

Spice comes in a number of colors, some more rare than others. Each planet produces a particular spice color, and some star systems are richer in spice than others.

You can gain spice by establishing colonies, forming trade routes, becoming a spice trader, or snatching it from unsuspecting colonies.
In the Sporepedia, you can access and publish all of your creations and review the creations published by other Spore players around the world. All creations in the Sporepedia are available for use in your game. Whenever you make a new creation and connect online, your creation is automatically uploaded to your MyCreations page.

**NOTE:** If you do not create an account and login to Sporepedia, you cannot access any online content. You may play with content that was installed with the game on your local system and anything you have created.

**SPOREPEDIA SCREEN**

1. Open in-game help Spore Guide
2. Creation resources (which creations are displayed in the browser window)
3. Your Spore stuff and community resources
4. Your buddies
5. Sporecasts (p. 54)
6. Close Sporepedia
7. Filters
8. Browser window
9. Scroll to off-screen content
10. Sort by different categories
11. Search for specific creations

To open the Sporepedia, press B. You can also click the Sporepedia icon in the lower-left corner of the Galaxy screen or in a game screen.

Through the left-hand navigation bar, you can browse all of the creations in Spore, explore the Spore community, and access the Spore Catalog to learn more about the latest Spore games. See Spore Catalog on p. 53.

You can catch up on the latest online Spore activities through the MySpore Page (p. 53). All creations provided with the game are available through the Maxis Sporecast. This Sporecast is updated on a regular basis. To review it, click MAXIS under Creations.

You can group your Spore creations together into a Sporecast to which your online buddies can subscribe. You can also configure your MySpore Page, where you can review and publish comments about your creations, define and join online events, and catch up on the latest Spore news.

**FINDING SPOREPEDIA CREATIONS**

In the Sporepedia, you can find creations through the Creations tab or published in Sporecasts to which you can subscribe.

Mouse over a creation to learn more about it. To get more information or to modify the highlighted creation, click the information bar that appears when you mouse over it.

**MY GAME**

Under the My Game tab in the left-hand navigation bar, you can review all creations you’ve encountered in each stage of the game.

**FILTERING**

At the top of the screen, you can see a set of icons that filter the displayed Sporepedia content by type of creation. To display available creation of a selected type, click one of the following icons:

1. Everything
2. Cells
3. Creatures
4. Buildings
5. Vehicles
6. Flora
7. Music

**SORTING**

The displayed creations can be sorted using the tools in the upper-right corner.

1. Sort by time of publication.
2. Sort by creation title.
4. Sort by type of creation. (Only available when you are viewing Everything.)

The following Shared icon lets you sort by whether you have published the creation to www.spore.com and only appears when you are viewing My Creations.

**SEARCHING**

You can use the Search bar to look for specific content online. When you enter a Search term, you are examining the creation’s Name, Creator, and Tags.

**NOTE:** The Search bar is a live search. The displayed results are immediately filtered by the contents of the Search bar at all times. For example, if you enter “ant” in the Search bar, “ant” and “anteater” may be returned, while “cont” will not.

**SPORE COMMUNITY**

The hub of your connections to the online Spore community is your MySpore Page. To open it, click MY SPORE PAGE in the left-hand navigation bar.

You can also visit the Spore Catalog.

**MYSPORE PAGE**

In the MySpore Page, you can review your current online statistics, including your total number of creations and Sporecasts that you have created and the number of Sporecasts to which you have subscribed. Additionally, you can catch up on recent news in the community and plan events in the future.

You can select or upload an image to use as your avatar. For more information, see www.spore.com.

**SPORE CATALOG**

Through the Spore Catalog, you can acquire the latest in Spore content, including new creations and features.

**ACHIEVEMENTS**

Review the various milestones you have achieved during Spore gameplay.

**BUDDIES**

Through the Sporepedia, you can find and connect to online buddies to subscribe to their Sporecasts. When you subscribe to a Sporecast, the creations in the Sporecast are more likely to appear in your game.

For information on finding a buddy, see the Sharing section of the in-game Spore Guide.
**SPORECASTS**

A Sporecast is a collection of creations provided by Maxis, you, or any other player in the Spore universe. You can create collections that have specific visual themes or functional purposes or that were found in the game.

- Subscribing to a Sporecast results in a higher chance of the content appearing in your game.

**NOTE:** You are automatically subscribed to the Maxis Sporecast. This Sporecast contains all creations and updates provided by Maxis.

Your Sporecast subscriptions are displayed under the Sporecast tab, where you can also find and make Sporecasts.

After you subscribe to a Sporecast, your local machine is updated the next time you connect to the Sporepedia.

**FINDING A SPORECAST**

The available Sporecasts are displayed three at a time.

- To browse the available Sporecasts, use the Next and Previous buttons at the top of the screen.
- You can search for a Sporecast using the Search bar.
  - To find a Sporecast, enter your search terms, and click SEARCH.
  - To find all Sporecasts, leave the Search bar empty, and click SEARCH.

**SUBSCRIBING TO A SPORECAST**

To subscribe to a displayed Sporecast:

1. In the Find Sporecast page, click SUBSCRIBE.
2. Then, click OK.
3. The Sporecast is now available in the left-hand nav bar. To review the available creations in the Sporecast, click the Sporecast name.
4. The creations are displayed.

**MAKING A SPORECAST**

You can publish a Sporecast containing a set of creations that you made or that are available in the game. Whenever you update a creation that is part of a Sporecast, the updates are automatically transferred to your subscribers when they next login to the Sporepedia.

- You can add creations to your Sporecast that are part of other Sporecasts.

**To create a Sporecast:**

1. In the left-hand navigation bar, click MAKE SPORECAST….
2. The Make Sporecast screen appears. The available creations are displayed.
3. To search for specific creations, enter your search term in the Search bar. Select the type of creation from the Type drop-down. Then, click SEARCH.
4. To browse the displayed creations, click the Next and Previous buttons.
5. To add a creation to your Sporecast, click the plus icon. The creation is added to the Sporecast gallery at the bottom of the screen.
6. To remove a creation from your Sporecast, click it in the gallery. Then, click the displayed minus icon. The creation is removed.
7. If you have more than 14 creations in your Sporecast, you can use the Arrow buttons at the bottom of the screen to browse them.
8. To save your Sporecast, enter a name in the Name field. You should add a Description to help users find it. Then, click the accept icon.
9. To cancel creation of a Sporecast, make a selection in the left navigation bar.

When you login to the Sporepedia again, your Sporecast is displayed under the Sporecasts tab in the left-hand navigation bar.

- To edit your Sporecast, click its name. Then, click the edit icon.
- To delete it, click the delete icon.

**PERFORMANCE TIPS**

**MACINTOSH SOFTWARE UPDATE**

An outdated version of your MacOS X system software may lead to issues with game performance. To be sure that you have the latest version of MacOS X, choose Software Update… from the Apple menu and follow the directions to update your system software.

**PROBLEMS RUNNING THE GAME**

- Make sure you meet the minimum system requirements for this game and that you have the latest drivers for your video card and sound card installed.
- For NVIDIA graphics cards, visit www.nvidia.com to locate and download them.
- For ATI video cards, visit www.ati.com to locate and download them.
- If you are running the disc version of this game, try reinstalling DirectX from the disc. This is typically found in the DirectX folder on the root of the disc. If you have Internet access, you can visit www.microsoft.com to download the latest version of DirectX.

**GENERAL TROUBLESHOOTING TIPS**

- If you do not have the disc version of the game and the AutoPlay screen does not automatically appear for installation and you are unable to open the disc drive icon found in My Computer and select AutoPlay.
- If the game is running slowly, try reducing the quality of some of the video and sound settings from the game’s options menu.
- Reducing the screen resolution can often improve performance.
- For optimum performance when playing, you may like to disable other background tasks (except the EADM application, if applicable) running in Windows.

**INTERNET PERFORMANCE ISSUES**

To avoid poor performance during Internet play, be sure that you close any file sharing, streaming audio, or chat programs prior to entering gameplay. These applications can monopolize your connection’s bandwidth, causing lag or other undesirable effects. If you are attempting to play on a corporate Internet connection, contact your network administrator.

**TECHNICAL SUPPORT**

- **MACINTOSH**
  - Choose ‘Software Update…’ from the Apple menu and follow the directions to update your system software.

**TECHNICAL SUPPORT ON THE INTERNET**

If you have Internet access, be sure to check our EA Technical Support website at [http://support.ea.com](http://support.ea.com).

Here you will find a wealth of information on DirectX, game controllers, modems, and networks, as well as information on regular system maintenance and performance. Our website contains up-to-date information on the most common difficulties, game-specific help, and frequently asked questions (FAQs). This is the same information our support technicians use to troubleshoot your performance issues. We keep the support website updated on a daily basis, so please check here first for no-wait solutions.

**TECHNICAL SUPPORT CONTACT INFO**

If you need to talk to someone immediately, call our Technical Support team on Monday through Friday 8 AM - 5 PM PST.

Telephone: US 1 (650) 634-1001

NOTE: The following warranties only apply to products sold at retail. These warranties do not apply to products sold online via EA Store or third parties.

Electronic Arts Limited Warranty

Electronic Arts warrants to the original purchaser of this product that the recording medium on which the software programs are encoded (the "Recording Medium") and the documentation that is included with this product (the "Manual") are free from defects in materials and workmanship for a period of 90 days from the date of purchase. If the Recording Medium or the Manual is found to be defective within 90 days from the date of purchase, Electronic Arts agrees to replace the Recording Medium or Manual free of charge upon receipt of the Recording Medium or Manual at its service center, freight prepaid, with proof of purchase. This warranty is limited to the Recording Medium containing the software program and the Manual were originally purchased by Electronic Arts. This warranty shall not be applicable and shall be void if, in the judgment of Electronic Arts, the defect has arisen through abuse, misrepresentation or neglect.

This limited warranty is in lieu of all other warranties, whether oral or written, express or implied, including any warranty of merchantability or fitness for a particular purpose, and no other representation of any nature shall be binding on or obligate Electronic Arts. If any such warranties are incapable of exclusion, then such warranties are limited to the extent permitted by law. If any such warranties are incapable of exclusion, then such warranties shall be limited to the fullest extent permitted by law. This warranty gives you specific rights. You may also have other rights that vary from state to state.

RETURNS WITHIN THE 90-DAY WARRANTY PERIOD

If the defect in the Recording Medium or Manual resulted from abuse, mistreatment or neglect, or if the Recording Medium or Manual is found to be defective after 90 days from the date of purchase, choose one of the following options to receive our replacement instructions:

Online: http://warrantyinfo.ea.com

Automated Warranty Information: You can contact our automated phone system 24 hours a day for any and all warranty questions: 1 (650) 628-1001
