HEALTH PRECAUTIONS

IMPORTANT HEALTH WARNING: PHOTOSENSITIVE SEIZURES

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people with no history of seizures or epilepsy may have an undiagnosed condition that can cause "photosensitive epileptic seizures" while watching video games. Symptoms can include light-headedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, momentary loss of awareness, and loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents, watch for or ask children about these symptoms — children and teenagers are more likely to experience these seizures. The risk may be reduced by being farther from the screen; using a smaller screen; playing in a well-lit room, and not playing when drowsy or fatigued. If you or any relatives have a history of seizures or epilepsy, consult a doctor before playing.

CO-DRIVER NOTES

During Rally events your Co-driver calls out a description of the corners and hazards ahead. Icons appear on screen to support these calls. Typical notes include…

• **Corner Description**: for example ‘Left Six’. The number indicates the severity of the corner, from 6 (least) to 1 (most). ‘Hairpins’ are also called, and considered more acute than a ‘1’. Where corners are close to each other the notes are strung together using the term ‘into’ or ‘and’.

• **Distances**: for example ‘Eighty’. The distance in meters to the next corner or hazard.

• **Hazard**: for example ‘Over Crest’ or ‘Narrows’. ‘Don’t Cut’ means a potentially hidden danger lies on the inside of the corner.
