Score Bonus Multiplier increases to a maximum of x5 by defeating enemies in quick succession as they appear

10/11) Bombs

Number of Bombs P1/P2 has remaining
Basic Game System

There are 3 ways a player's ship can attack enemies: Main Weapons (shots), Sub-Weapons (missiles), and Bombs.

**Main Weapon**
- Items automatically fly towards the player's ship if the Main Weapon button is released.

*Images of the Fighting Thunder ME-2's weapons shown. Try out all the weapon combinations for each ship/character!*

When you get a Main Weapon item, your ship's Main Weapon will increase in power by 1 stage. The weapon being fired will depend on the color of the Main Weapon item and your ship.

**Sub-Weapon**
- A more powerful subweapon will be fired if you let go of the shoot button for a few seconds.

- **Nuclear Missles**
  - Damages all enemies in the area of contact

- **Homing Missles**
  - Chases enemies down

- **Radar Missle**
  - Chases down enemies in front of the player's ship

**Bomb**
- Greatly damage all enemies on the screen. Power of the bomb's blast depends on the ship/character.

*Image of the Fighting Thunder ME-2's Bomb shown.*

**Other Items**

**Score Items**
- These are worth 3,000 pts each. Points awarded from these items are tallied at the end of the stage. If your ship is shot down, the amount of score items is reset to zero.

- **Fairy**
  - If you find and collection one, the Fairy will supply extra items to you if your ship is shot down.

- **Full Power**
  - This item will upgrade your current weapons to full power

- **1UP**
  - Player's lives remaining +1
**OverKill System (OverKill Mode)**

In OverKill Mode, if you destroy a medium-sized or bigger enemy, an "OverKill meter" will appear. While in this state, you can keep attacking the enemy and its "OverKill meter" will fill up. The more damage you can do to it better time runs out, the greater score bonus you will get.

**Score Items (OverKill Mode)**

- **Score Medals (Lv1, Lv2, Lv3, Lv4, Lv5)**
  These are awarded based on how much damage was done to an enemy while its "OverKill meter" is still up.

- **Score Rings**
  These are awarded for defeating enemies quickly as they appear.
  Gold Rings are worth 3000pts. Silver Rings are worth 1000pts.

**Flash Shot System (Arcade/AdditionalMode)**

In the Arcade Mode and Additional Mode, you will get a multiplier to your score for defeating enemies in quick succession as they appear in the screen.

- **Score Items (OverKill Mode)**

</tr>
<tr>
<td>LV5</td>
<td>100000pts</td>
</tr>
</tbody>
</table>
In Raiden IV: OverKill, you can choose to play as 1 of 3 fighters.

**Fighting Thunder ME-2**
This is a very balanced ship suitable for all players. Weapon strength and movement speed are average. Its bomb can instantly clear the whole screen's enemy bullets.

**RAIDEN Mk-II**
This is the classic RAIDEN ship that is more suitable for experienced players. Weapon damage is high but movement is slower. Its bomb takes a moment to land but does a great deal of damage.

**FAIRY**
The Fairy is a tricky character to use. It's attacks are very different from the RAIDEN ships and it's movement speed is much faster. Its bomb calls for assistance from friendly faeries and attacks all enemies on the screen.
