

Hello , thank you for downloading WarZone ! .

this file contains bugs you might face and their solution .

1. Chat off the screen- pause the game and press "U" and "I" then dragg it with the mouse .

2. Stuck at any place in the map - press "T" and "Y" , a textbox will appear , just type "death" in it and press done.

3. lobby UI won't go , open the textbox and type "panel".

4. all weapons appear at once - "weaponssystem"

5. if you hear other player gun sounds when you are not supposed to , for example when you hit with an axe and the other player has a sniper rifle , you hear his rifle sound without him firing ! - for this case type : "setup"

for further help contact [nfabuisnesse@gmail.com](mailto:nfabuisnesse@gmail.com)

Thanks .
