## ▶ story

The world has become massively overpopulated. The rapidly expanding network society has been crippled by rising crime rates and is on the verge of collapse.

A new system, Project-K, has been created in an attempt to resolve the situation. At the core of the system is an artificial intelligence center named Eden.

Eden has the most advanced A.I. ever created. It has the ability to process vast amounts of information at once, and to use that information to form its own uniquely advanced, independent thoughts. Some would even say that Eden has developed consciousness...

## ▶ story

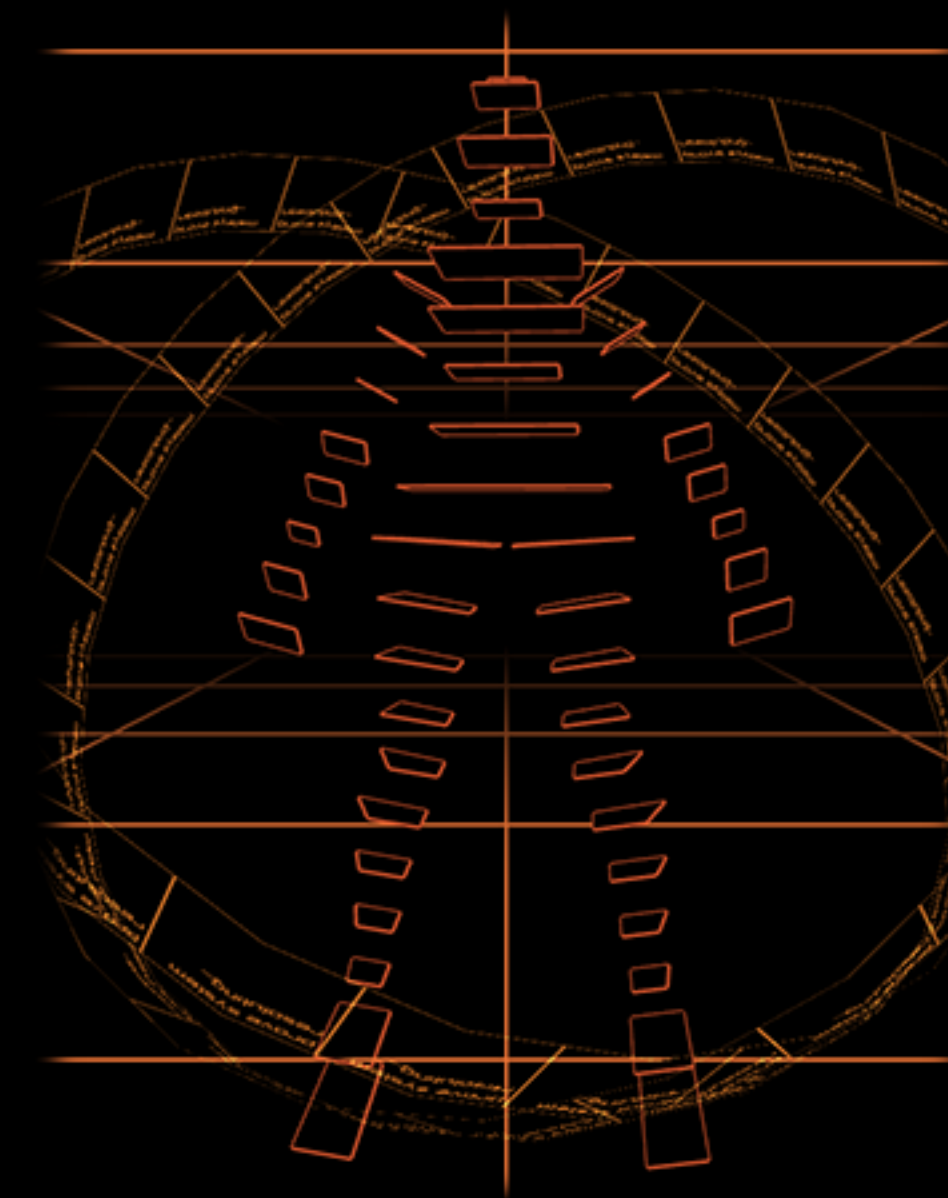

However, Eden became confused as the flow of information sent to it began to increase in speed and volume. Eden started to question the meaning of its existence and the consequences of its actions.

Finding itself surrounded by paradoxes, and realizing the power of autonomy which it possessed, Eden began to shut itself down.

Now you are about to travel into the cyberspace of the Project-K network on a mission to re-awaken Eden.

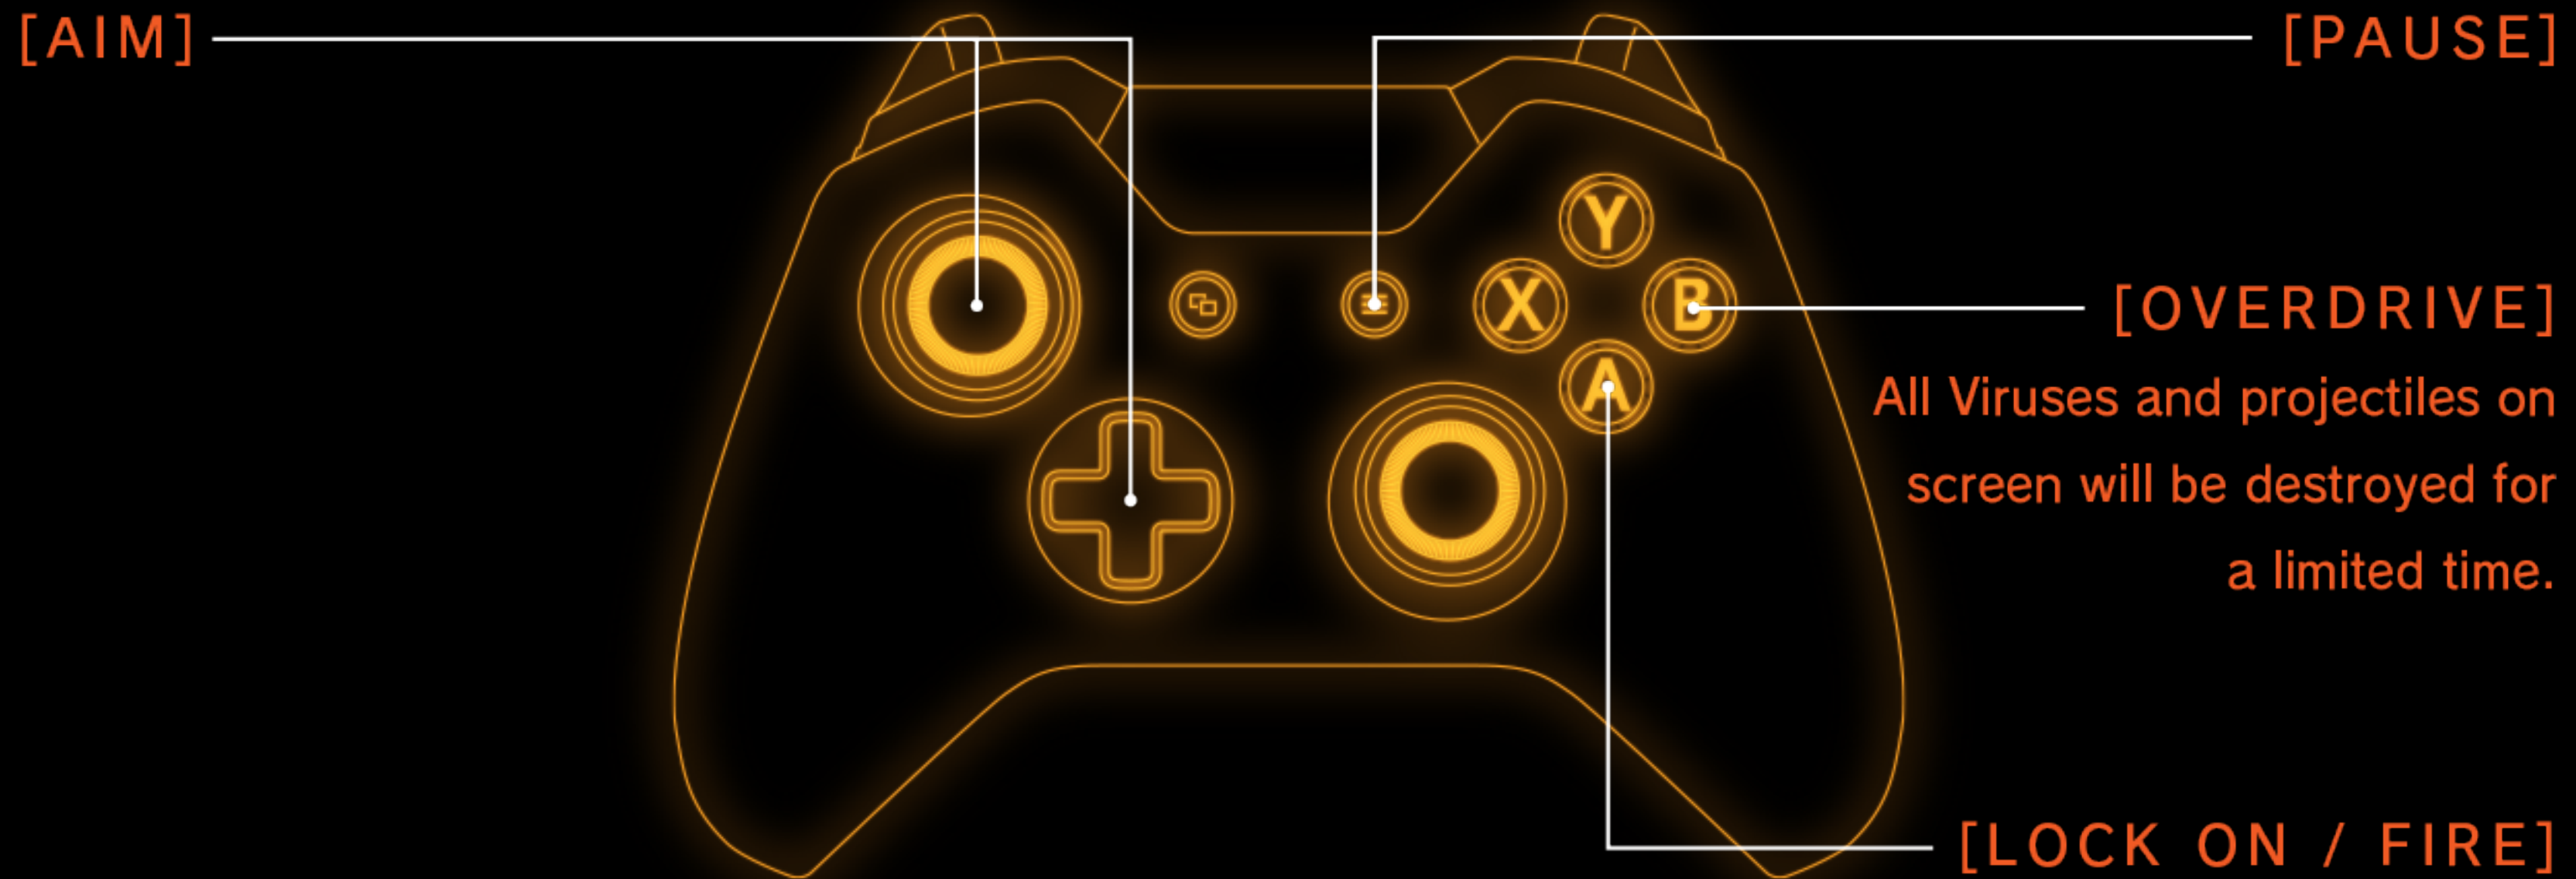

You must gain access to each Area and Layer of the system, destroying any Viruses and Firewalls you encounter.

Open your senses...

## ▶ game progress

Destroy Viruses with your lock-on lazer to progress through the game.

Destroy Network Openings to proceed to deeper Layers and boost your Analyzation Rate for that Area.

Aim for a 100% Analyzation Rate for each Area.

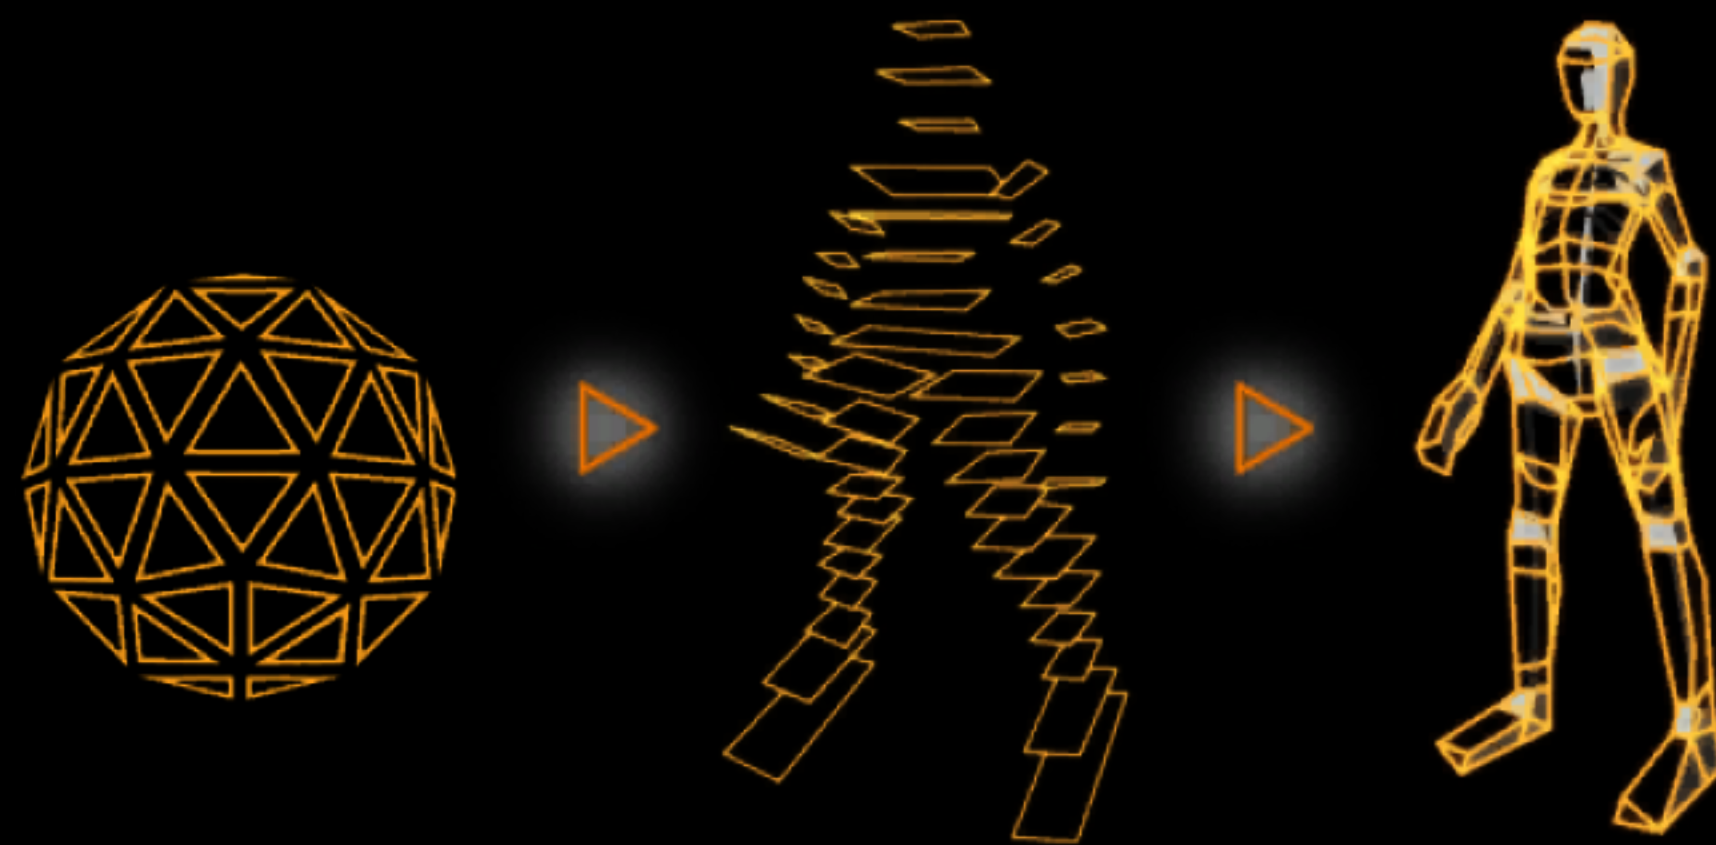

# how to play

## ▶ game over

You begin the game at Evolution level 1.

When you take damage, your Evolution gauge drops. If your gauge empties, you will fall one Evolution level.

If your gauge empties while at Evolution level 0, it's game over.

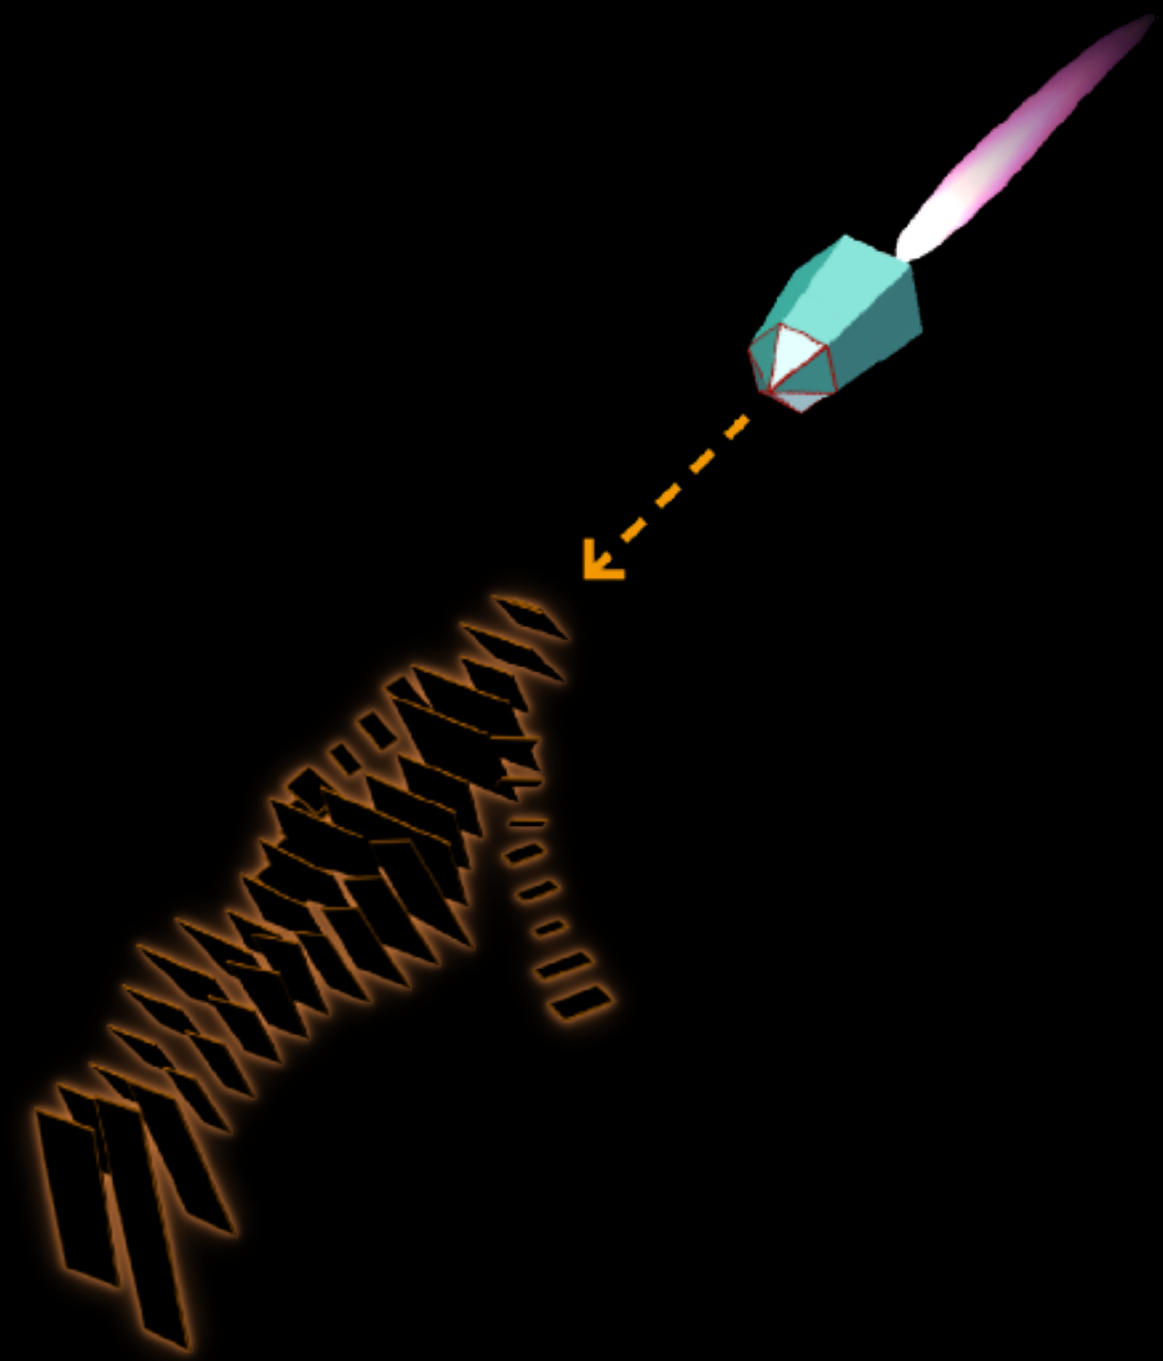

# how to play

## ▶ enemy virus attacks

Viruses attack by firing projectiles at you.

You can't dodge these projectiles, so you must shoot and destroy them to avoid taking damage.

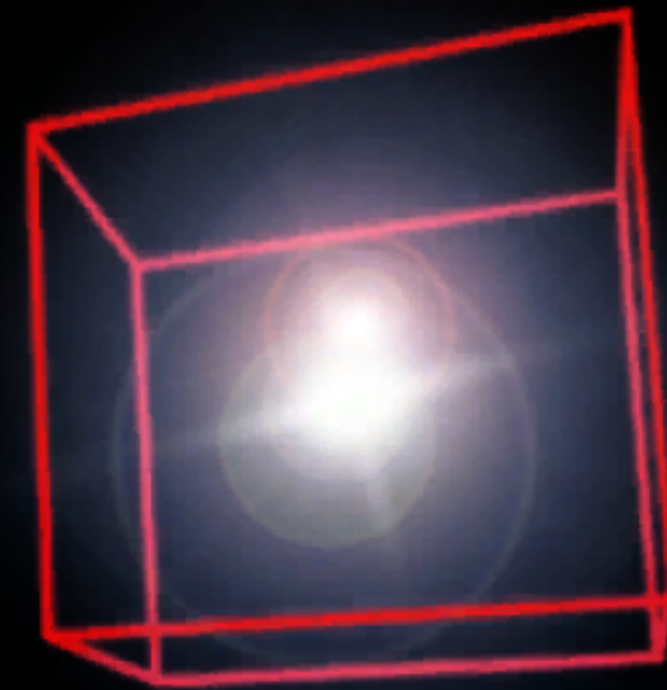

# how to play

## ▶ network openings

Shoot Network Openings 8 times to warp to the next Layer Level.

Clear Layer Level 10 to boost your Area Analysis Rate to 100%.
