

Introduction

Now you can kart like never before! Super Sonic Racer takes you on a wild journey that encompasses four unique worlds. You get to choose from twelve over-the-top characters and vehicles that range from driving as the local pizza dude to driving as an alien on a high-tech, electric-powered superbike from the year 2400!

So, go ahead and strap yourself in, this is going to be a wild ride!

SETTINGS

Use 'SETTINGS' if you want to adjust the "SFX volume" and/or the "Music volume"

PLEASE NOTE: Controls can be found at the end of this manual.

Track and Tournament selection

If you finished first, you are the winner. After winning four races in a world, the next world will unlock.

Ocean World

In this world you will race through a fantastic underwater environment. The Ocean World is a living planet that is entirely covered in water.

Trash World

Have you always wondered where that garbage you throw away each week has been going? The answer is Trash World.

Game World

This game-themed world is a blast to race in, and it is no wonder so many drivers fly in to partake in the competitive races.

Nightmare World

It's dark, creepy, slimy, scary; It's everything that you can (but don't want to) imagine. Only the bravest of all racers make it this far, but it takes a Supersonic Racer to win.

Characters

After track selection, you will proceed to the character and vehicle selection screen.

You can choose your character by pressing the left and right arrows on your keyboard. There are 4 characters available when you first begin your quest. To unlock more racers, you must win at least two races.

Twelve over-the-top wacky characters and vehicles are available in this game.

Pick-Ups

There are six different pick-ups you can obtain. Your character can only carry one pickup at a time. Before you can collect a new one, you have to use your old one!

Speed Boost Gives you an instant nitrous boost.	
EMP (Electro Magnetic Pulse) Slows down everyone around you for a few seconds.	
Homing Missile Shoot the characters in front of you. Once locked, your opponent gets hit every time!	
Straight Missile Shoot the characters in front of you. This makes sure that your opponents will have a difficult time steering to the finish line.	
Mine A mine will be dropped on the road. Once an opponent drives over a mine they have a big problem.	
Shield This shield will protect you against the incoming missiles, mines and EMPs from your opponents.
