

BALL GRABBERS

What do you think of when you hear “Ball Grabbers”? That’s right, *physics-based Sports-Arcade soccer fighting madness!*

Challenge your friends in **Ball Grabbers**, grab the ball better than them, and scoooooore! Pick your character based on your strategy, perform Power-Shots, throw curve balls, and do what you must to beat everyone else until you’re crowned the ultimate Ball Grabber.

Choose from 5 gorgeous arenas filled with detail and use their shape and quirks to your advantage! Select a character from 3 unique fighters, each with strengths of their own. Ball Grabbers plays best with controllers, but can also be enjoyed on a single keyboard by two players – like back in the day!

Tips & Tricks

Power Shot

If you can, Grab the Ball from the air to perform a **Power Shot!** When activated, you have 2 seconds to throw the ball with extreme power. It's easy to learn, hard to master!

Dash & Tackle

Keep on **Dashing** to get to the Ball faster, and to tackle your opponent!

Techniques

You're not always in a hurry to throw the ball, you can also run towards the goal to score. While you're at it, it may be worthwhile to keep on jumping so you're harder to hit!

Arena-specific Tips

Each arena has its own quirks that can help you, but also play against you. Here are a few gotchas you can use to your advantage in each Arena:

Sheep County

The sheep keep walking on the field, and they may interfere with your game, so it might be better to throw them outside the arena. However you could perhaps throw them either on your own side, or your opponent's side of the Arena, in order to make your opponent grab them while you're catching the Ball.

Game of Balls

The bombs are going to explode when they hit anything, *unless you grab them in the air*. When you've grabbed it, you can throw it towards your opponent and it will explode and stun him/her. Or you can throw it to the Ball, possibly making it bounce towards your opponent's goal.

Dummy Beach

There are a bunch of traps at the Beach. Usually it's best to try to avoid them. At the start of the game *don't run straight towards the Ball*, but instead, go around the trampoline trap! However, when you hold the ball, you can use the trampoline to get higher and then throw the ball from the air!
